

# Technology Report

September, 2012

This month in technology we have worked on the following:

- The following projects were updated for this school year:
  - Network upgrades and switches replaced at OMS and OHS
  - Server upgrades to newer servers and in process of moving data to new servers
  - Email upgrade to Exchange 2010 server
  - Wireless upgrade to more secure and robust system
  - Assist Ener-Tel with installation of fire alarm systems
  - Assist Ener-Tel with installation of security systems
- Testing continues and changes continue to be made to systems as we see issues.
- Graduated students and changed campuses for 9<sup>th</sup> and 6<sup>th</sup> graders and set up each student account in Active Directory and cleared server space of old data.
- Assisted new teachers with email, technology issues, training on Mimio and Mobi systems and adapting to our systems.
- Worked on getting student devices ready and checked out for students who are seniors or are in dual credit programs.
- Assisted band directors in getting both offices connected and updated and making sure they have access to resources online that they need.
- Learned and programmed the digital sign at Lion Stadium, and continue to work on different displays.
- Worked with TeamWorks support to get new program installed on administrator computers, then it will be hosted online through their servers. We will train faculty and staff on its use and implementation.
- Worked with testing coordinator and support at CSCOPE to troubleshoot issues with CSCOPE and get it working in the district.
- Went to training to implement Project Share within the district.
- Worked with librarians to get Destiny software upgraded and students graduated and enrolled in correct campuses and classes.
- Worked with Coach Jackson and SchoolView technical support to get Schoolview set up, programmed and running at all places at OES, we continue to work with teachers and train them on implementing use of SchoolView technologies in their teaching.
- Worked to resolve connectivity issues between OMS and Field house wireless systems
- Worked at OES getting all labs up and running.
- Upgraded Live@EDU system to Office 365 and set up student accounts for OHS students which will give them email and access to Office programs anywhere they have internet.
- We continue to assist and train teachers and staff with issues or questions that arise.
