

MCS D Health Adoption 2018-2024

The Comprehensive Sexual Education Plan (CSEP) is a document that each school district is required to have developed, approved, and implement in accordance with OAR Rule 581-022-1440.

This winter the Health Adoption Committee and Health Advisory Committee reviewed and provided feedback for this document. The specifics of what is included in the plan include:

- Outlines standards specific to sexual health; disease prevention; promotion of mental; social, and emotional health; violence and suicide prevention.
- Explains district policy and state laws associated with health instruction
- Outlines standards by grade level tied to the four areas
- Guidelines for parent / community involvement and who to contact with questions
- Includes parent opt out letters
- Reviewed and approved by school board every two years

The Health adoption committee met with community members in all three communities the last week of February to explain legislation, documentation, standards, curriculum, and answer questions. In each of the community we had great questions and feedback from community members.
