

New Berlin CUSD #16
Superintendent Report
February 16, 2023

Calendar 2023 – 24

There were 10 NBEA representatives that served on the calendar committee in addition to the administrators. The calendar is set to accommodate the building project. The biggest changes are:

- Three (3) Teacher Institute Days at the beginning of the year, but administrators and teachers feel this will allow time for professional development, required trainings, and collaboration to occur.
- 1:00 pm dismissal monthly vs. Wednesday at one-hour dismissal. The change will allow teachers and staff to be more productive in getting curriculum and building initiatives accomplished.
- Graduation date tentatively set for May 12, 2024.

Summer School

See attached proposal.

Pre-Bid Information

- The scope of Work for the early bid package is Precast Architectural Concrete Wall Panels (material and installation) and main electrical gear (equipment only).
- The reason for the early bid package is due to long lead times in order to keep the construction schedule as previously presented.
- Bids will be due on Friday, March 10th at 10:00 AM
- Advertisement for Bids can go out the day after the board approves the motion.

High School Math Change

- The decision to go from Integrated math (Math 1, Math 2, Math 3) back to the traditional math (Algebra 1, Geometry, Algebra 2) was made beginning with freshman graduating in 2027.

School Meal Standards Comparison

- Attached you will see the recommended school meal standards by the USDA in comparison to what is currently approved. My plan is to communicate these out to parents and students once approved.

Return to Learn – 6 Month Review

This is a requirement. No changes at this time.

Solar Update

There have been two meetings with the building project engineers, facilities directors, and the solar company. The specific equipment has been scoped out for the building project as well as the equipment at NBE.

Update on Design Development

BLDD architect Kayla Peck will share the progress that has been made on the building project.
