

January Heart at Work Winner

This month's Heart at Work award winner is Betty Hull, Director of Information Services. She was nominated by Special Education Coordinator, Enid Fontenont, for showing kindness and understanding when she quickly scheduled a meeting to help solve a problem.

TEA recently implemented a new accountability process for State Performance Plan Indicators. It was very difficult and time consuming to gather the necessary data needed to report the results to TEA. Enid had to contact each teacher, look up every student for specific information and continue to update the spreadsheet as changes occurred. Enid brought her dilemma to Betty, who quickly pulled together her team and within 24 hours the problem was solved. Now, it only takes a simple click of a button to generate the required reports.

Board of Trustees Appreciation

Governor Rick Perry has proclaimed January 2009 as *School Board Recognition Month* to help build awareness of the crucial role an elected board of trustees plays in our communities and schools. The Keller Independent School District truly appreciates the hard work and dedication of each of its seven Board Members, who voluntarily tackle the enormous job of governing this school district, and whose actions and decisions affect the present and future lives of our children.
