Ms. Walsh asked the board if a discussion item could be added after her superintendent report. She said there was new information since the agenda had been approved. It is their curriculum for next year.

Ms. Walsh thanked Nabholz for the fabulous meal they provided the board with today. She asked Paul and Chris to give an update on the construction. Chris said all the buildings have been demolished. They are cleaning up footings and the demos should be wrapped up this week. He said they would start site utilities in about a week or so. Paul said they are pricing design development drawings. He said if you imagine zero to 100% drawings, they are probably at the 60-65% mark. They have a very good understanding of what is in the building. They are taking that and getting pricing from subcontractors to make sure they are tracking it along. The project is going great. The design team has been incredible and the team at the school. Taking the design development drawings, they will move into what they call construction drawings (which they will actually build off of). They have gotten structural drawings for the north half of the building. They are looking to procure some of those items to keep moving forward.

Mr. Powell asked if they were still on track. He said absolutely. Ms. Walsh said she understood they are nearly a month ahead.
