

## BP 7000 (a) CONCEPTS AND ROLES

**Note:** Pursuant to [14.11.020](#), borough assemblies or city councils and regional school boards may by resolution request responsibility from the State Department of Education and Early Development for the planning, design, and construction of school facilities funded by state grant funds. [A.S. 35.15.080](#) provides for the assumption of responsibilities for state public works projects subject to [AS 35.15.010](#). Pursuant to [14.14.060](#) and [14.14.065](#), borough assemblies and city councils may agree to a division of duties with the school board related to the design, maintenance, and construction of facilities. Assemblies and councils must consider the recommendations of the school board. The following sample language should be revised or deleted to reflect district responsibilities and needs.

Since school construction is costly, and buildings become a permanent part of the community to be used by large numbers of people, the School Board and the district administration must take great care to ensure that the facilities fully support the intended educational and community programs, will be appropriately maintained, may be altered conveniently and inexpensively to meet future educational and community needs, provide a healthy environment, and fit harmoniously and attractively into the community.
