Re: Authorizing the purchase and installation of the backup systems upgrade

In order to protect critical data within CISD systems and applications, an upgrade to our current backup solution is needed to increase capacity and maintain manufacturer support. In preparation for the backup systems upgrade, we have reviewed and evaluated three proposals. We have selected Technogent to implement this project based on the price and the quality of the products and services provided.

Vendor	Backup Solution	Professional Services	Total
Presidio	\$184,210.47	\$13,000	\$197,210.47
Technogent	\$192,000	Inc.	\$192,000
NetSync	188,031.84	\$7,288.65	\$195,320.49

Recommendation:

The Board of Trustees authorize and approve the purchase and installation of the backup systems upgrade by Technogent as presented.
