

Conceptual Rendering of Science Building Seismic Retrofit

ASHLAND SCHOOL DISTRICTCAPITAL BOND PROGRAM

END OF MONTH REPORT – JANUARY 2025

GENERAL PROGRAM UPDATE

In January, all levels of the Humanities building were turned over for occupancy. Off hours efforts have included completion of steel guardrails/railings at the building perimeter, flashing on the humanities rooftop and final pieces of prime and paint. Punch work is nearly complete throughout the campus and controls install and air balancing are in final stages. The fire alarm upgrade are advancing and will continue into the beginning of March. The Science Building Seismic Retrofit is currently progressing through preconstruction.

PROJECT ADMINISTRATION

Project administration and accounting support are two key areas critical to Program success. This is a combined effort of HMK Company and ASD Accounting Department. In the month of January, we requested 1 additional purchase order and processed 5 invoices.

PROJECT ADDITION & RENOVATIONS TO EXISTING BUILDING

PROJECT DESCRIPTION

- New and renovated classroom space to replace 3 existing classroom wings, approx. 65,000 sq. ft.
- Campus security
- Air Quality improvements and Climate resilience for existing buildings, including new construction
- Required tech infrastructure

CURRENT ACTIVITIES

Ashland Middle School and TRAILS Outdoor School are complete, and staff and students are fully occupying the new spaces.

Throughout each campus, upgrades in HVAC systems, plumbing, and electrical are prevalent, introducing energy efficiency air quality improvements and climate resilience resulting in more accommodating environments for maximum learning opportunities. Each school has received upgraded widows, new roof systems, new restrooms and redesigned administrative/office spaces. The project also resulted in improvements to overall campus security, technology infrastructure, seismic upgrades and accessibility. Both schools have been retrofitted with fire alarm and fire suppression systems as well. Each school campus has its own vehicle entry and exit with clear-cut pick up and drop off areas to assist with reduced congestion during high traffic periods.

Ashland Middle School comprises about 40,000 sq. ft. of the project including a new library and addition of a newly constructed two-story 6th grade building with an elevator. The campus includes a leadership room with full kitchen designed to host campus events. The SPED area includes multiple classrooms and offices with an additional calming space, private restrooms, and secure outdoor learning area. The covered courtyard is central to the campus with a multifunctional design including reclaimed wood beam stadium style benches for outdoor educational purposes and skateboard accommodating features allowing students a safe and fresh outdoor space for various activities. The kitchen and cafeteria have also been upgraded with new appliances and renewed finishes.

TRAILS Outdoor School has an entirely separate, newly renovated building stretching across 26,000 sq. ft. of useable space. The campus now includes 5 classrooms, a library, art lab, testing room, SPED room, music facility and multi-purpose room. There is also a grand outdoor structure attached to the building, allowing activities in adverse weather, including an integrated rock-climbing wall. The multi-purpose room, also known as the community room, is the highlight of the building. This area not only provides a place for staff and students to congregate for events but is equipped with large windows and roll up doors that can be opened to connect to the outdoors. Designing this aspect of the multi-purpose room was fully intentional and a defining characteristic of the school culture. The adjacent ready room has a full kitchen, which accommodates preparation for outdoor activities as well as daily meal requirements.

CURRENT ACTIVITIES

With the completion of this project, Helman Elementary School staff, students and community members are now able to fully utilize the renovated campus. The renovations included a brand new approximately 23,000 square foot classroom building to replace two of the existing quad buildings.

The construction of this building has a net reduction in the school's energy use that truly models the Ashland School District's adoption of the City of Ashland's Climate and Energy Action Plan (CEAP). The new classroom building also includes a SPED instructional space with exterior play area, sensory room with state-of-the-art furnishings, a large multipurpose room with an operable exterior wall and multiple breakout spaces scattered throughout the building.

The front administration area underwent a full renovation that included an access-controlled entry. New reception area, conference room and staff work room concluded the new spaces included in the administration area.

Campus wide, a new 4-Pipe hydronic HVAC system that includes new high efficiency boilers, new air handlers and a new chiller was installed. A new building controls system, allowing the district to operate the new systems as efficiently as possible and minimize any maintenance or troubleshooting delays, was also included. The campus also received a new fire alarm system bringing everything up to current building codes.

On the exterior of the site, a new entry drive was installed that will aid with traffic congestion during high traffic periods. Additional parking was installed at the south end of the campus. There is a brand new 1/8th mile walking track and new playground that is accessible to all. New landscaping wraps up the remainder of the campus.

CURRENT ACTIVITIES

All three levels of Humanities were made available for occupancy at the beginning of January. Final pieces of completion are limited to exterior work that is being achieved after hours and over weekends.

Punch work is concluding throughout campus while programming of lighting control and HVAC, air balancing and system commissioning continues to progress.

The campus wide fire alarm system upgrades are nearly complete with minimal scope remaining in the theatre building which will then transition all efforts to the gymnasium. This is expected to be finalized in the first part of March.

The Science Building Seismic Retrofit design is complete, and the subcontractor bid process is underway. The need for early work and long lead material procurement is under review in anticipation of the upcoming start of construction.

ACTIVITIES SCHEDULED FOR NEXT PERIOD

- Sub-contractor Selection for the Science Seismic Retrofit Project
- Completion of punch list items
- Commissioning of new electrical and mechanical systems
- Progression of the fire alarm installation

CURRENT ACTIVITIES

The Walker Elementary School renovation is now complete. This project brought much needed improvements to the existing Walker School that will provide the community with a state-of-the-art educational facility for many years to come. The older classroom annex was demolished in order to construct a new classroom wing that also allowed the front entrance to be relocated creating a much more intuitive office space. The historical wing of the building received structural upgrades by way of a state funded seismic grant. The entire classroom building received new finishes, upgraded energy efficient exterior envelope that included new windows and new furniture.

The renovation and addition has a net reduction in the school's energy use that truly models the Ashland School District's adoption of the City of Ashland's Climate and Energy Action Plan (CEAP). The

new addition also includes a SPED instructional space with exterior play area, sensory room with state-of-the-art furnishings, dedicated resource rooms and multiple breakout spaces scattered throughout the building.

Campus wide, a new 4-Pipe hydronic HVAC system that includes new high efficiency boilers, new air handlers and a new chiller was installed. A new building controls system, allowing the district to operate the new systems as efficiently as possible and minimize any maintenance or troubleshooting delays, was also included. The campus also received a new fire alarm system bringing everything up to current building codes.

The gym underwent a seismic upgrade making this building now rated to withstand a seismic event. In addition, it received a new roof and exterior paint as well as HVAC upgrades.

The exterior of the site underwent extensive renovations in order to improve campus security and student and automobile circulation. The parking area was extended, and the traffic flow was reconfigured to create a more cohesive format for pick up and drop off that eases congestion in the neighborhood and adjoining streets. The exterior was fenced creating a secure campus and the newly configured front entrance added access control in order to create a single point of entrance. A new fully accessible playground was installed as well. New landscaping wraps up the exterior improvements.
