DISCUSSION ITEM: Consideration of Approval for the Purchase of Student Data Conversion Services from Precision Task Group to Assist in the Transition to Workday Student

DISCUSSION: Precision Task Group will provide services to extract, profile, analyze, cleanse, and transform data from our legacy Banner environment for migration to our Workday Student platform. There will be four defined worksets and two move to production (MTP) milestones that will detail the information needed at each phase. This will be a 24-month engagement for these services. The cost for these services is not to exceed $1,001,925, and the budget for this expenditure is part of the Workday Student Implementation project approved at the April 26, 2022 Board Meeting.
