- Long-range planning - I will start to organize the things we already do at different levels into our indicators with the information I received from the MESS-E committee and the middle school. I will plan to have this compiled by our December meeting. At that point, we can see what more information we need from teachers to find places areas of need. - What is the best time to do this? February?
 - February is a good time to survey teachers - less busy
 - EE Shared folder is not working? The fix is in progress - fixed
 - Option for Action piece moving forward. Keep saltwatch? Add other options? Thoughts on action projects that tie in with Global Temperature change? Could we just change the saltwatch survey to touch on Global Temperature change.

- Lets have options for citizen science options by April/May to be in place for next school year
- Temperature monitoring
- Look into Climate Generation
- Maybe keep saltwatch as a option
- Thoughts on things we need to focus on as a committee that I am missing?
 - Reach out if needs arise
