

## **METHODS OF FINANCING**

Growth, safety considerations and educational program changes may require the construction of new facilities and the reconstruction of existing facilities. The purchase of school sites and the construction of buildings may be financed by any legally provided means which the district is qualified to employ, including state-financed assistance.

The superintendent shall determine the anticipated share of the school district's participation in the cost of any proposed school construction or major maintenance project, and shall evaluate available means of making the local contribution required by law. These alternatives may include the sale of capital bonds, the use of available federal funds or funds from other sources and, where applicable, locally contributed labor, material or equipment.
