

Personnel

General Personnel Transportation

When a staff member becomes ill or is injured during the workday, it may be necessary for the staff member to be taken home or to a medical facility for treatment. When this situation occurs, the ill or injured staff member shall notify his or her immediate supervisor of the need to go home or seek treatment at a medical facility. The supervisor, in consultation with the school nurse when possible, will determine whether emergency paramedic assistance is needed. It will be considered customary to use emergency paramedic staff to transport an ill or injured staff member.

The school district accepts no responsibility and denies any liability with regard to transportation of personnel by other staff members. Staff members who volunteer to transport other staff members are engaging in a task which is outside of the scope of their employment.
