- **More**

- Trust with students an school board because of the 7 day period
- Denfeld trying to figure out absences at the school

Budget Cuts – These cuts will impact our daily lives, but it's crucial to prioritize and continue focusing on equity in the district, even as we make the cuts. We must recognize the historically disadvantaged communities within the district and ensure that we don't move backwards in terms of equity. It's important to maintain progress and not lose the progress we've made toward inclusivity and fairness. I think with gathering feedback from the schools, it will be very helpful to give facts, and numbers to the students where the money is going to right now, so its not students saying things blindly and hoping that their thoughts will be allocated.
