Lincolnshire-Prairie View School District 103

Memo

To: Board of Education
From: Dr. Craig Chatham
CC: Dr. Scott Warren
Date: July 10, 2025
Re: Technology & Assessment Executive Summary

CoSN Trusted Learning Environment - Update

- I recently submitted information for 1 of the 5 components of the Trusted Learning Environment certification. I am waiting to hear back from the review process and will keep the Board updated. I have left the following information on this report if you'd like to review additional details about the program.
- We are working toward earning the designation of being a "Trusted Learning Environment" through a certification process via the Consortium for School Networking (CoSN).
- This process helps us strengthen our data privacy practices to ensure we are doing everything we can to protect the data of our stakeholders.
- While we believe our data privacy practices are currently strong, we believe we can always improve, and this process will help us to do so.
- Anticipated completion date = Summer 2026

Summer Projects

- Finish network upgrades at Daniel Wright
- Collecting, cleaning up, repairing, and preparing iPads
- Refining AI Guidelines for Fall release
- Updating and improving our Knowledge Base (how-to's, resources, etc)
- Cleaning up inventory records.
- Audio System installation in Daniel Wright Green Gym.
- Projector refreshes at Daniel Wright and Laura B Sprague.
- Other minor hardware refreshes.
- Refining and aligning Visitor Management processes.
- Preparations for AI Sessions during fall institute days.
- Continue to explore the possibilities with AI.
- Summer Safety Refresher (Full morning of revisiting our safety processes and practicing our protocols).

CSTA Conference
- During the week of July 7, I attended the Computer Science Teachers Association conference in Cleveland, Ohio.
- The conference provided confirmation about many of the strategies we've been utilizing in analyzing and implementing computer science, computer literacy, and AI practices in D103.
- Additional resources and ideas were gathered that will assist in our continued planning and evaluation of computer science in D103.

AI
- AI of the month!
  - Have you wondered if coding skills are still important in the age of AI? Click HERE to read about why one organization thinks coding is possibly more important than ever.
