

Technology Dept Report

April 17, 2017

PowerSchool University

- I turned in a request to attend PowerSchool University at Anaheim California. PowerSchool has grown from one server to five servers and different modules are added all the time. This year it is planned to add the special education module. This is training from the PowerSchool Software Designers and not other school district employees like the user group conference in Las Vegas.

Classroom Technology

- The 9th Grade laptops for next year have been ordered. We are developing a plan to collect the current laptops before the last day of school and cleaning them up over the summer.

Security/Video

- We have replaced all of the dead cameras at Minico. The quality of the new cameras are a huge improvement compared to the old cameras. The next phase is to install new cameras in the entry ways.

Online Registration

- We are working on a new student registration form that will allow a brand new student to fill out all the necessary information online without the need to come to the school. Because of the non-stop work orders that keep being submitted, this project has been put at a lower priority for the time being.

Phones/Intercom

- Minico's new phones are installed and working. Once Paul Elementary and West Minico phones are replaced in the first part of August. The entire school district will have a four-digit extension system and consolidated phone lines.

Work Orders

January	February	March
93 New	65 New	81 New
78 Resolved	73 Resolved	64 Resolved
66 Incomplete	58 Incomplete	75 Incomplete
