Technology Report

February, 2012

This month in technology we have worked on the following projects:

- Attended the annual Texas Computer Educators Association Conference in Austin, met with vendors and attended break out sessions dealing with networking and technology in education. Those attending were Kat Clayton form OMS, Linda Thompson from OHS, Tiffany Esparza and Keith Harmsen from Technology.
- Worked with issues on Exchange Server and email delivery.
- Worked with Ener-Tel checking all the security cameras and DVR. They will need to replace 4 cameras at OHS and work on the connections for 3 cameras at OMS. Worked on the DVR systems at OES with our wireless network and made it so that Mrs. Jackson and Mrs. Savala can access the cameras at OES from their laptops.
- Worked with VOAG installing SolidWorks, a computer aided design program. We had to update the version from last year.
- Worked at OMS and OES installing Imagination Station software on labs.
- Worked with OMS on Think Through Math software and connection issues.
- Worked with District Testing Coordinator in submitting information to State and setting up End of Course Exams for those students that will be taking it, and planning for online TELPAS testing.
- Worked with Special/Federal Programs Coordinator in planning and setting up new iPads for student use.
- Worked in OES labs with connectivity and student sign on issues.
- Scheduled and set up several Distance Learning conferences for students and administrators.
- Held trainings for Mimio and CPS systems.
- Post information on Website for reports and employment positions.
- Met with many teachers for 1 on 1 teaching and training for using technology.
- We continue to support faculty, staff, and students with issues and needs that arise.
