

AHS Science Building Revealing New Concrete, Siding, Soffit and Structural Upgrades!

# **ASHLAND SCHOOL DISTRICT**CAPITAL BOND PROGRAM

END OF MONTH REPORT – JULY 2025

**HMKCO.ORG** 

#### **GENERAL PROGRAM UPDATE**

The magnitude of improvements to the Ashland High School Campus in these brief summer months is astonishing. Closeout of the Modernization Project including completion of the Gym chiller install has progressed significantly. The bulk of structural modification associated with the Science Building Seismic Retrofit are complete and the Quad Renovation is proving to develop into the flagship project of the Ashland High School campus.

Simultaneous completion of the Modernization Project, Science Building Seismic Retrofit and Quad Renovation will conclude construction on the Ashland High School Campus. Several construction zones have already been turned over to the District for occupancy and the remainder are scheduled to be complete the second week of August, allowing staff time to settle back into their classrooms and common areas.

# PROJECT ADMINISTRATION

Project administration and accounting support are two key areas critical to Program success. This is a combined effort of HMK Company and ASD Accounting Department. In the month of July, we requested 1 purchase order and processed 9 invoices.

Contract Type	Number of Contracts	Value
Professional Service Agreements / Design Contracts		\$ 22,755,464
Construction Contracts	1	\$ 107,635,484

# **CURRENT ACTIVITIES**

Ashland Middle School and TRAILS Outdoor School are complete, and staff and students are fully occupying the new spaces.

Throughout each campus, upgrades in HVAC systems, plumbing, and electrical are prevalent, introducing energy efficiency air quality improvements and climate resilience resulting in more accommodating environments for maximum learning opportunities. Each school has received upgraded widows, new roof systems, new restrooms and redesigned administrative/office spaces. The project also resulted in improvements to overall campus security, technology infrastructure, seismic upgrades and accessibility. Both schools have been retrofitted with fire alarm and fire suppression systems as well. Each school campus has its own vehicle entry and exit with clear-cut pick up and drop off areas to assist with reduced congestion during high traffic periods.

Ashland Middle School comprises about 40,000 sq. ft. of the project including a new library and addition of a newly constructed two-story 6<sup>th</sup> grade building with an elevator. The campus includes a leadership room with full kitchen designed to host campus events. The SPED area includes multiple classrooms and offices with an additional calming space, private restrooms, and secure outdoor learning area. The covered courtyard is central to the campus with a multifunctional design including reclaimed wood beam stadium style benches for outdoor educational purposes and skateboard accommodating features allowing students a safe and fresh outdoor space for various activities. The kitchen and cafeteria have also been upgraded with new appliances and renewed finishes.

TRAILS Outdoor School has an entirely separate, newly renovated building stretching across 26,000 sq. ft. of useable space. The campus now includes 5 classrooms, a library, art lab, testing room, SPED room, music facility and multi-purpose room. There is also a grand outdoor structure attached to the building, allowing activities in adverse weather, including an integrated rock-climbing wall. The multi-purpose room, also known as the community room, is the highlight of the building. This area not only provides a place for staff and students to congregate for events but is equipped with large windows and roll up doors that can be opened to connect to the outdoors. Designing this aspect of the multi-purpose room was fully intentional and a defining characteristic of the school culture. The adjacent ready room has a full kitchen, which accommodates preparation for outdoor activities as well as daily meal requirements.

# **CURRENT ACTIVITIES**

With the completion of this project, Helman Elementary School staff, students and community members are now able to fully utilize the renovated campus. The renovations included a brand new approximately 23,000 square foot classroom building to replace two of the existing quad buildings.

The construction of this building has a net reduction in the school's energy use that truly models the Ashland School District's adoption of the City of Ashland's Climate and Energy Action Plan (CEAP). The new classroom building also includes a SPED instructional space with exterior play area, sensory room with state-of-the-art furnishings, a large multipurpose room with an operable exterior wall and multiple breakout spaces scattered throughout the building.

The front administration area underwent a full renovation that included an access-controlled entry. New reception area, conference room and staff work room concluded the new spaces included in the administration area.

Campus wide, a new 4-Pipe hydronic HVAC system that includes new high efficiency boilers, new air handlers and a new chiller was installed. A new building controls system, allowing the district to operate the new systems as efficiently as possible and minimize any maintenance or troubleshooting delays, was also included. The campus also received a new fire alarm system bringing everything up to current building codes.

On the exterior of the site, a new entry drive was installed that will aid with traffic congestion during high traffic periods. Additional parking was installed at the south end of the campus. There is a brand new 1/8<sup>th</sup> mile walking track and new playground that is accessible to all. New landscaping wraps up the remainder of the campus.

#### **CURRENT ACTIVITIES**

Closeout of the Modernization Project remains on schedule for August completion. Focus points through the month of July included resolution of punch items, installation of the Gym chiller system, owner demonstration and trainings as well as balancing and commissioning of mechanical systems.

The month of July was undoubtably the most productive for the Science Building Seismic Retrofit and Quad Renovation. The majority of work has been completed with only a few items remaining to be closed out. Incomplete scopes of work are scheduled to be finished in the first two weeks of August. As of August 18<sup>th</sup>, efforts will be limited to punch work and the delayed install of the Quad sunshade due to lead time issues. The combined Seismic Retrofit and Quad Renovation project is proving to be an enormous improvement to the AHS campus that staff and students will enjoy for decades to come.

## **CURRENT ACTIVITIES**

The Walker Elementary School renovation is now complete. This project brought much needed improvements to the existing Walker School that will provide the community with a state-of-the-art educational facility for many years to come. The older classroom annex was demolished in order to construct a new classroom wing that also allowed the front entrance to be relocated creating a much more intuitive office space. The historical wing of the building received structural upgrades by way of a state funded seismic grant. The entire classroom building received new finishes, upgraded energy efficient exterior envelope that included new windows and new furniture.

The renovation and addition has a net reduction in the school's energy use that truly models the Ashland School District's adoption of the City of Ashland's Climate and Energy Action Plan (CEAP). The

new addition also includes a SPED instructional space with exterior play area, sensory room with state-of-the-art furnishings, dedicated resource rooms and multiple breakout spaces scattered throughout the building.

Campus wide, a new 4-Pipe hydronic HVAC system that includes new high efficiency boilers, new air handlers and a new chiller was installed. A new building controls system, allowing the district to operate the new systems as efficiently as possible and minimize any maintenance or troubleshooting delays, was also included. The campus also received a new fire alarm system bringing everything up to current building codes.

The gym underwent a seismic upgrade making this building now rated to withstand a seismic event. In addition, it received a new roof and exterior paint as well as HVAC upgrades.

The exterior of the site underwent extensive renovations in order to improve campus security and student and automobile circulation. The parking area was extended, and the traffic flow was reconfigured to create a more cohesive format for pick up and drop off that eases congestion in the neighborhood and adjoining streets. The exterior was fenced creating a secure campus and the newly configured front entrance added access control in order to create a single point of entrance. A new fully accessible playground was installed as well. New landscaping wraps up the exterior improvements.
