Seating in FETC Workshops is on a first-come, first-served basis.

Workshop #1:

\$W125 | Deploy and Manage Chromebooks Like a Pro!

Room: NORTH 320E

Description

Get practical advice, tips, and tools for developing a successful Chromebook program at your school. Whether you are just getting started with Chromebooks, or are already managing thousands of them, you will learn essential tools, practices, and strategies for deploying, managing, monitoring, and protecting your devices. These tips will save you time and money and help ensure your devices are optimized for learning.

Workshop #2:

\$W279 | Azure Power: Discover the "Click-to-Deploy" Cloud

Room: SOUTH 331C

Description

The Microsoft cloud is rapidly transforming K-12 education. As schools go digital, "education in the cloud" is an exciting and challenging prospect, especially for school districts with operations rooted in physical classrooms and significant investments in on-premise technology infrastructure. In this hands-on workshop, Rob Dickson will share how Omaha Public Schools (NE) is leveraging Microsoft Azure Infrastructure-as-a-Service (IaaS) and Platform-as-a-Service (PaaS) to save money and drive improved student outcomes. Cloud architect Dustin Ryan will join Rob to demonstrate how easy spinning up solutions on Azure can be. The goal of the workshop is simple — to engage in deeper dialogue on how your school and district can leverage Azure to support your transformational work.

LL205 | 5 Inventory Mistakes You Don't Know You're Making (And How to Fix Them!)

Room: Booth 2549

Description

With more technology in the classroom than ever before, inefficient inventory management is not an option. Learn how some of the largest districts in the country have identified (and fixed) their inventory mistakes to ensure students and staff have the resources and they need to be successful.

C197 | Immediate Response: Homeland Security Is Here to Help

Room: SOUTH 320A

Description

After an incident occurs on your school network, how do you respond? Do you have the technical support to determine what happened and how to mitigate it? Not everyone does. In this session, Analyst Christine Sahlin will cover what resources are available through the Department of Homeland Security's NCCIC Hunt and Incident Response Team to assist schools in responding appropriately as well as proactively hunting threats. Learn how the NCCIC team will bring technical expertise to get your network back on track with services available to school districts on request at no cost to the district.
