September 9, 2025 Construction Update

SLP Public Schools Central Community Center

The Central Community Center Gym and Pool Remodel project involves renovating the locker rooms & showers, upgrading pool systems to include a wheelchair lift, refurbishing the pool gutter and three gym areas, and converting existing space into a boardroom/training room. Additionally, the project includes replacing part of the built-up roof.

SLP Central Community Center – Family Shower Room

A photograph of a modern locker room. The room features rows of grey metal lockers with perforated doors and silver handles. In the foreground, there are wooden benches with metal frames. The ceiling is composed of red acoustic tiles, and a long fluorescent light fixture is visible. The walls are made of light-colored cinder blocks. The floor is a smooth, light grey material.

Locker Room

A wide-angle photograph of an indoor swimming pool. The pool is rectangular with blue water and black lane lines. In the foreground, a stainless steel handrail curves along the pool's edge on a grey tiled deck. To the right, a white diving board with a 'WARNING' label is mounted on a metal frame. The far wall is decorated with a row of orange and black pennant flags. A sign on the right wall lists pool rules under the heading 'ST LOUIS PARK AQUATICS'. The pool area is well-lit with overhead lights.

SLP Central Community Center – Board /
Training Area Focal Point Wall

The image shows a long, brightly lit interior hallway. On the left, a wall is covered in large, light-colored wood panels arranged in a grid pattern. A black metal railing runs along the edge of this wall. The ceiling is white with a grid of recessed lighting and several long, rectangular pendant lights hanging from it. The floor is a light-colored, polished surface. In the background, there are several doors and a red scissor lift. To the right, there is a yellow wall and a black metal cart with boxes on it.

SLP Aquila Elementary Addition and Remodel

The Aquila Elementary Addition and Remodel project consists of a 15,000 SF addition. The new spaces created in the addition are: 4 Kindergarten Rooms each with a separate bathroom, Kids Place Area, Music Room, and Flex Space / Storm Shelter with bathrooms, and mechanical rooms.

The summer remodel will refresh and enlarge the cafeteria, expand the office space, and provide a new resource and sensory area

SLP Aquila Elementary – Hallway Refresh

A photograph of a large construction site for a school cafeteria. The space is filled with construction materials, including stacks of wood, metal framing, and various tools. A red JLG scissor lift is prominent in the center, and two large industrial fans are in the foreground. The background shows a partially completed wall with yellow insulation and a large window opening. The overall scene is one of active construction.

SLP Public Schools High School Stadium Team Rooms

The high school stadium team room project consists of the removal of the existing home side bleachers. The construction of a new storm shelter and storage building (approximately 7,000 SF combined), new accessible bleachers, and replacement of the existing turf carpet.

The storm shelter will consist of two team rooms, four restrooms, and mechanical rooms. The storage building is a separate building with two group restrooms and a gender-neutral restroom.

SLP HS Stadium – Team Room

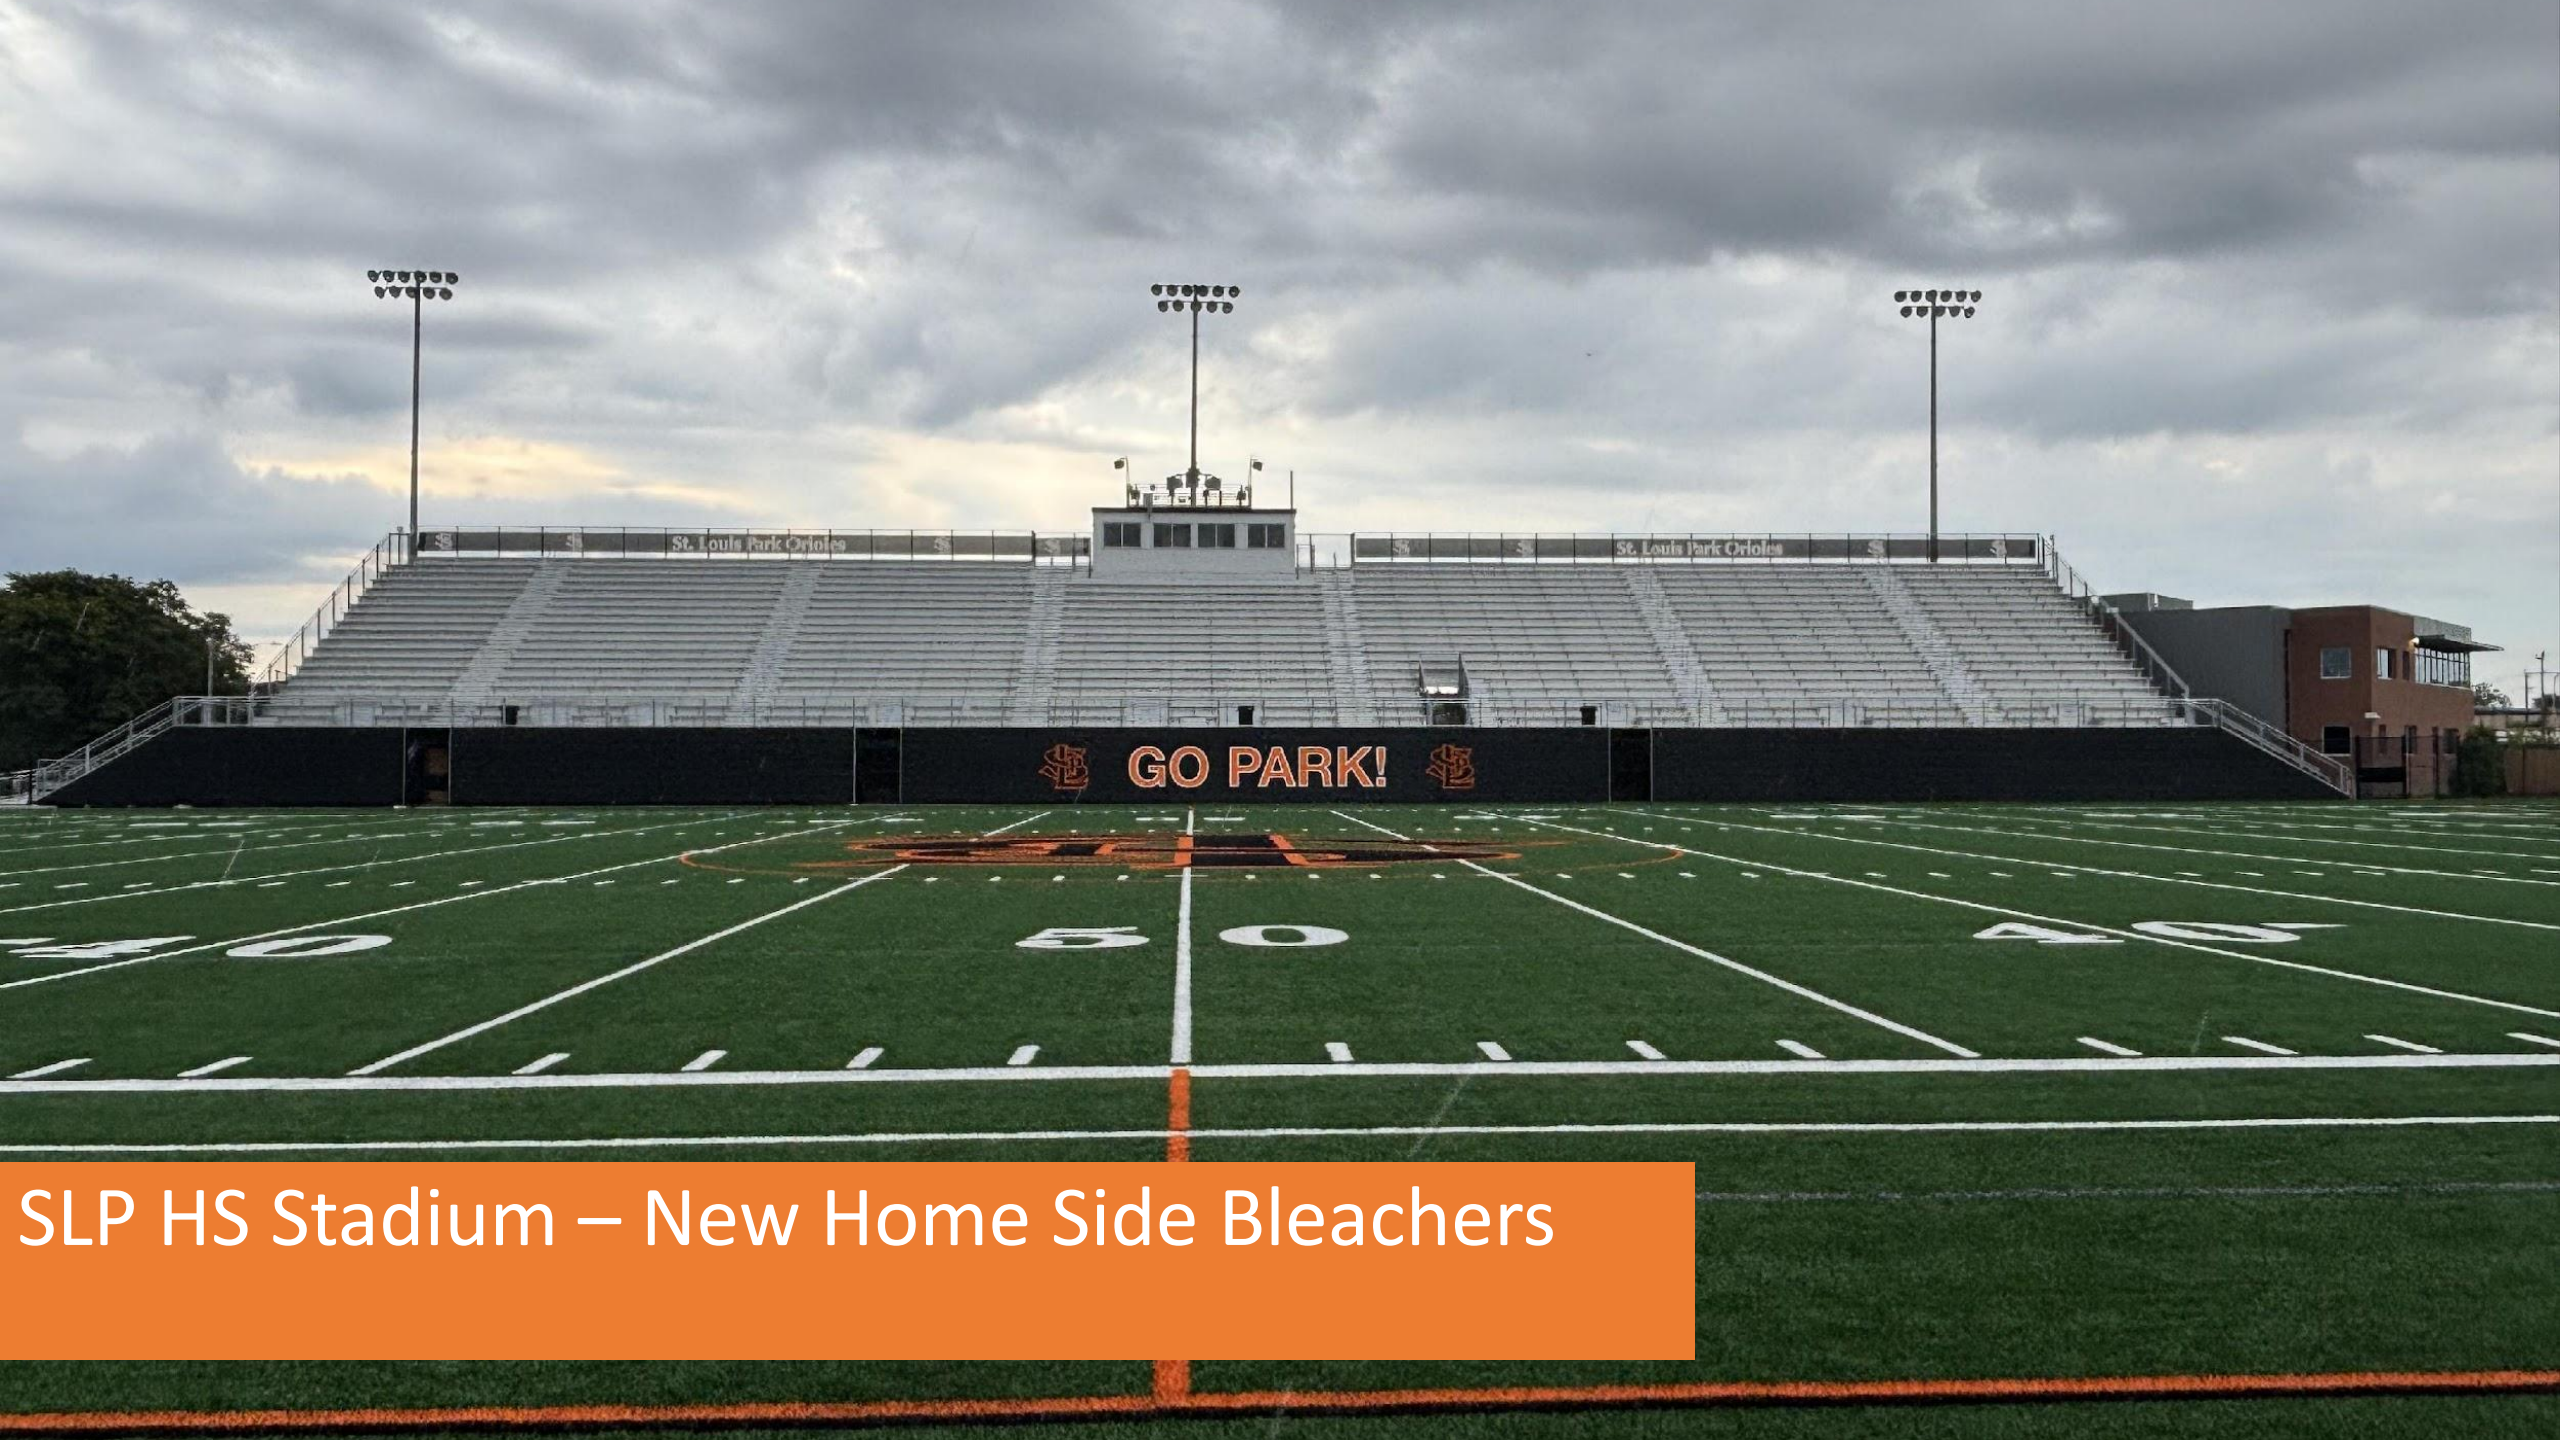

SLP HS Stadium – Storage Room

The image shows a long, narrow storage room with a polished concrete floor and white walls. The ceiling is exposed, featuring a network of grey pipes, red fire lines, and several long, bright fluorescent light fixtures. On the left side, a stack of cardboard boxes sits on a wooden pallet. In the center of the room, two large white bulk bags are placed on a pallet, with some dark debris or equipment nearby. To the right, a black door is set into the wall, topped with a red exit sign. The room appears to be a functional storage area for a stadium.

SLP Public Schools High School Restroom Remodel 2025

The high school restroom remodel 2025 project consists of removing all finishes, common plumbing wall and plumbing related to the two bathrooms. Then reconstructing with new piping, fixtures, walls, and all finishes and lighting.

The two bathrooms being reconstruction are on the east side of unit a building.

In addition to the two bathrooms the remaining green tile was removed and new tile installed.
