Region XI Fiber Connection Update

Region XI is in the process of taking bids to connect all Region XI schools to Region XI through fiber for internet access purposes. These internet access costs would be covered by the Federal eRate program in the range of 70%-80%. Denton ISD's eRate coverage is 60%. This would amount to a substantial savings for Denton ISD of 10%-20% off our monthly internet access costs.

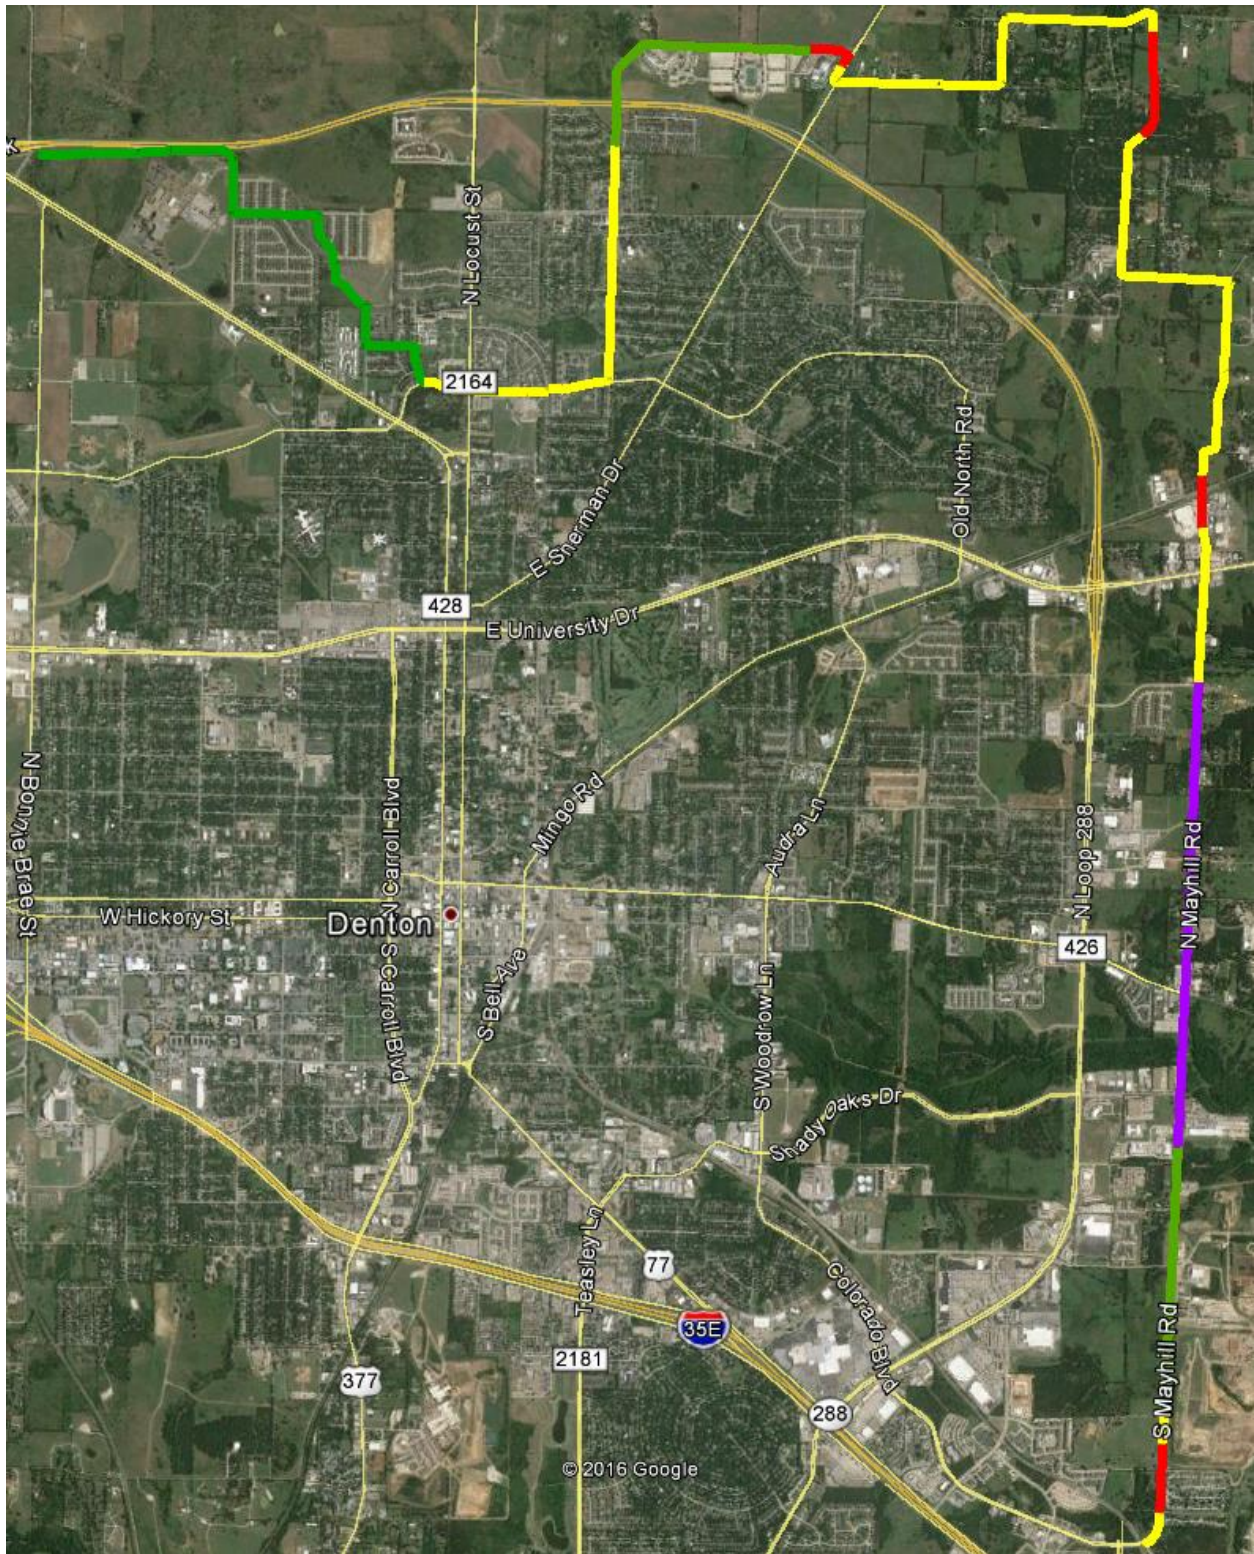

The Technology Department is in regular communication with Region XI regarding this process. We should receive final pricing information by early April and be able to determine if this would make sense financially and functionally for the District. If so, we would be able to take advantage of this program beginning July 1, 2016.
