

Browning High School
Board of Trustee Report
August 2, 2016
Submitted by John E Salois

Since the building administrators have been back we have been working on instructional planning for math, and will continue with ELA. During the planning we have been looking at assessment data for the purposes of student placement, finalizing the master schedule, identifying professional development needs and updating our building action plans. John Parente, Travis Miller, Kari Belcourt and John Salois participated for the high school. Violet Sinclair also participated with both the high school and middle school as our building Title I and Assessment Data Coordinator.

During the month of June the building administrators participated in planning meetings with our building's instructional coach. We developed goals and meeting plans for the upcoming year. The high school also had teams that attended the Montana Behavioral Institute (MBI) conference in Bozeman, and AVID in Anaheim, CA. The participants will share their information at staff and SLT meetings for inclusion in our building action plans for MBI and PDSA (Plan Do Study Act) cycle for continuous improvement.
