

Option #1 - Far left (south side of facility)
We could get 20 parking spaces in there which
would put all staff on south side & closer to the
building than the green, grassy area closer to the highway

Option #2 - Was originally intended to be parking lot. This would add approximately 58 total slots for cars. Will cost more but will add much needed spaces for extra-curricular events like Thursday's night's 6th grade music program.
