Board Meeting Date: March 3, 2025

Title: Artificial Intelligence

Type: Discussion

Presenter(s): Nick Kwiecien and Christian Vaillancourt, Microsoft

Description: Microsoft has been involved for the past few decades in the MSP community, and specifically with the Edina Community where our regional office is located. Following a fall 2024 AI overview session with the MSP Mayor Council, James Hovland asked Microsoft leaders to share with the Edina School Board insights on AI market dynamics, use cases and lessons learned. This will be a dynamic dialog where board members can ask specific questions on how AI, how AI solutions can be leveraged in our community and School district.

Recommendation: Review presentation prior to work session.

Desired Outcome(s) from the Board: Review presentation and come with questions.
