Community Input Survey

Board Goal I-VI

Purpose of Report Provide an overview of the recent “What We Value” community input survey.

Objectives

- Begin the construction of a local accountability system based on the community’s values

Operational Impact The results of this first survey will be disaggregated to determine community values, which will drive the construction of a second, more detailed survey in the areas emphasized by survey results. As a result, the district will develop measurements of key performance indicators, which will impact the daily work of district employees.

Results See above.
