Elementary Mathematics Textbook Adoption

Beginning September 2007, a committee of 33 elementary teachers and 3 campus administrators began the textbook adoption process. After creating a scoring rubric, the committee members evaluated 6 titles. In November, this committee narrowed the selection to two options:

- EnVision Mathematics, a Pearson Scott-Foresman publication
- Texas Mathematics, a Mcmillan Mc-Graw Hill publication

On January 21, after reviewing and teaching with these two options, CISD elementary staff had the opportunity to hear directly from the publishers and finally reflect through an electronic survey.

This memo serves as a recommendation from the Elementary Textbook Adoption Committee to order **EnVision Mathematics, a Pearson Scott-Foresman publication**, as our new elementary mathematics textbook adoption.

Furthermore we recommend adopting all titles except:

- Saxon Mathematics, Saxon Publications a Harcourt Achieve Imprint
