Re: Adjustments to COVID-19 Contingency Plan

Today the Soda Springs School Board moved from a contact-based approach to a symptom-based approach to deal with COVID-19. If a student is sick and/or showing any symptoms, the student must be kept home.

The board approved the following changes to the School District's COVID-19' Contingency Plan:

1. After a confirmed positive COVID-19 test, the student must be in quarantine for 5 days and show no symptoms or taking any fever reducing medications prior to returning to school.
2. If student B comes in close contact to student A who has a confirmed positive COVID-19 test and Student B shows NO symptoms, then Student B is to stay in school. The board highly recommends that Student B wear a mask for 7 calendar days. A letter will be sent to the parents of Student B informing them of the close contact and outlining the recommendations.
3. For any team, club, or class traveling outside of Soda Springs, a mask is **required** to be worn when leaving the bus at a convenience store, restaurant, fast food establishment, etc.
