Re: Board Goals for 2017-2018

10 August 2017

The following are the proposed Board goals for 2017-2018 that the Communications Task Force drafted at our last meeting. Please come prepared to discuss these in our open meeting on Monday 8/14/17.

Thank you! Kent

2017-18 Board Goals

1. The Board will further develop the plan for engaging community members in a two-way communication process to inform decision-making and enhance transparency. This may include: developing their own social media presence; establishing more user-friendly links on the website; assembling a Key Communicators Network; and other means.
2. The Board will continuously monitor District performance through presentations at Board meetings throughout the year, enhance the District website data dashboard, and present reports to the public in a visually straightforward format.
3. The Board will transition from Neola to PRESS to update policies and policy guidelines through input, discussion and possible approval of recommendations from the administration and the Policy Committee.
