Browning Public Schools – Browning High School

Project: Alerton Ascent Control Module (ACM) and Compass Software Upgrades
Date: September 5th, 2023

The following is ATS Inland NW proposed pricing for the project mentioned above based upon the scope and project clarifications listed below.

ATS will replace the existing Envision for BACtalk software with the latest Compass software on the existing server computer supplied by Browning School District. The existing software version is no longer available or supported by the manufacturer through updates as of 1/31/2021.

ATS will replace the existing Alerton global controller (BCM-ETH) with the latest Ascent Control Module (ACM) by Alerton. The existing global controller is no longer manufactured or supported by Alerton as of December 2019.

ATS will provide new graphical displays, animations, and new 3D floor plans.

ATS will provide a training course of (4) four hours at a date and time that is agreeable to both parties.

Project Clarifications:

- Proposal includes the latest Alerton Compass software version with a medium license key to accommodate all existing devices on the BACnet network. License size will allow for future device expansion.
- Proposal includes a database backup of the system after the new software has been installed on the server. New backup will be stored on ATS server.
- Proposal includes new graphical displays and animations, and new 3D floor plans.
- Proposal includes complete functionality test of the ACM and Compass software.
    - Includes verification of graphical displays, trend logs, alarms, and schedules.
- Proposal includes demo of the existing BCM-ETH controller.
- Proposal includes an external battery pack to be supplied with the new ACM to allow for orderly shutdown in the event of a power failure.
- Proposal includes ACM configuration to match the existing BCM-ETH. The new ACM will be loaded with schedules, alarms, trend logs, and point data that will be saved from the BCM-ETH.
- Proposal includes an ACM device license to accommodate the devices currently on the network.
- Proposal assumes existing global controller enclosure and power supply will be reused.
- Proposal assumes using existing School provided server to run new Compass 2 software. Required OS is Window 10 (64bit, Pro/Ent) Windows 11 (Pro/Ent) Windows Server 16,19 or 22. Assumes remote access and local admin privileges for ATS.
- Proposal assumes working during normal business hours.
- Proposal excludes high voltage wiring.

Project Pricing:

Proposed project pricing:.....................................$ 20,877

All Pricing valid for period of 45 days from date of proposal, plus tax if applicable

I appreciate the opportunity to provide you with this proposal and look forward to our continued involvement in maintaining your Alerton system. Please sign and return this document via email to begin the work noted above.

I encourage you to contact me directly at (406) 880-6836 or WymanP@atsinlandnw.com with any questions or additional requests. Thank you.
