

OK sports fans....let the games begin. This is just to get you up and running. There are a couple of things still not settled (at least in my mind anyway), but this release should capture the majority of the school finance provisions. I am still working on the Notice and hope to have it completed soon.

As reminder, this template is only for the purpose of comparing state aid under 2019-20 "current law" to most of the school finance provisions in HB 3 now that it has passed both chambers.

The following allotments/grants are not computed at this time, due to no data/rates being available and/or my lack of understanding:

- 1) Teacher Incentive Allotment
- 2) Mentor Program Allotment
- 3) College Prep Assessment Reimbursement (pertains to certain fees paid by district)
- 4) Educator Effectiveness Fee Reimbursement (pertains to certain subsidies paid by district)

It also reflects my limited understanding of some of the hieroglyphic (to this old man anyway) language in the bill, and I confess, I have not read the entire 300+ pages of the bill, so there could be some things I've missed. However, since you all are in a hurry to see what this bill does to/for you, here it is. My initial impression from the conferees is Senate 1, House 0.

There are a number of changes that will happen in 2020-21 but I haven't gone thru (or understood) all of them yet, so this is only for 2019-20.

As always, stay tuned.... after things settle down, I will release the 'normal' looking template.

Sec 48.255(b): St Compression % (SCP) = lesser of:	Effective 20-21

Sec 48.2551(b): Max Compressed Tax Rate (MCR): Lesser of (1) or (2):	Effective 20-21
(1) $MCR = (1.025 \times ((PYDPV+E) \times PYMCR)) / DPV$	
Prior Yr District Property Value (PYDPV)	85,675,634
Expiration of Ch 313 or some Ch 311 value limitation (E)	0

District Current Yr Property Value (DPV)	100,805,771
% OF VALUE GROWTH	17.6598%
MCR if value growth is less than 2.5%	N/A
MCR if value growth is equal to or exceeds 2.5%	0.8102
MCR	0.8101
OR, (2) State Compression Rate (SCP)	0.9164
MCR [Lesser of (1) or (2)]	0.8101

NOTE #1: All MCRs have to be within 90% of all MCRs in the state: If MCR is less than SCR x .9, MCR = SCR x .9, else it just the MCR; This is the template's calculated MCR (not official - read Note #2 below)	0.8247
---	--------

NOTE #2: the MCRs above are based on the T2 values entered on the data entry tab & are not your "official" MCRs. TEA will calculate each summer your "official" MCR that will be based on their own estimate of your T2 value. Here is TEA's "official" MCR for 20-21: (each year, you can compare the MCR above to see how close your T2 value was to TEA's calculated T2 value)	0.9164
--	--------

d towards the bottom of the 'Calc Data' tab. I thought it was important to mention the importance of MCRs, since they relate to the maximum M&O tax rate Tax Rate (VATR), formally known as a TRE (which is what I still call it).

< WARNING >
 Beginning 20-21, TEA is going to calculate your 'official' Tier I compressed rate in early August - it may not be the same as what is calculated here (see Release 15 Notes).

NOTE: If the board does not unanimously adopt the rate shown in (3) above for the 20-21 school the \$.05 shown in (2) (B) above will revert to \$.04... so was it adopted unanimously by the board?

SEE WARNING ABOVE: Because HB 3 mandates that all Tier I compressed tax rates be within 90% of (than 10% different than any other rate) and because Comptroller property value data will not be tax rate now that we have switched to using current-year values, TEA is going to use July 25th your Tier I compressed rate. Since your max TRE rate is simply your Tier I compressed rate + \$. the 'official' max rates. The 'official' rates will be the Tier I compressed rate TEA calculates until after TEA calculates it, reportedly sometime in the late July/early August timeframe.
