"The Scarlet Ibis" by James Hurst

It was at the edge of woods, where wood structures had not yet been built, that the bird fit in the bleeding tree. The forest garden was at peace with nothing broken imagined periods and moments gone dark and the purple stained. The five o'clocks by the chimney still marked time, but the whole rest of the elm was unmarked and rocked back and forth like an empty cradle. The last grown and flowers were blooming, and their small daff across the cotton field and through every room of our house, speaking softly the names of our dead.

It's strange that all this is as if so clear to me now that the summer has long since fled and time has had its way; a girickstone slams where the bleeding tree stood, just outside the kitchen door, and now if an oriole sings in the elm, its song seems to die up in the leaves, a silver clut. The flower garden is plain, the house a gleaming white, and the pale fence across the yard stands straight and spruce. But sometimes (like right now), as I sit in the cool, green-chapped parlor, the girickstone begins to turn, and time with all its changes to ground away—and I remember Doodle.

Doodle was just about the craziest brother a boy ever had. Of course, he wasn't a crazy crazy like old Miss Leewide, who was in love with President Wilson and wrote him a letter every day, but was a nice crazy, like someone you meet in your dreams. He was born when I was six and was, from the outset, a blue-eyed, blue-haired. He examined all head, with a tiny body which was red and shivered like an old man's. Everybody thought he was going to die—everybody except Aunt Nancy, who had

What is the setting of the story?

Solve for X:

$$x - y = 5$$

$$\frac{1}{2} + \frac{1}{2} = \frac{2}{2} = \frac{1}{1} = 1$$

What associations are triggered by the color red?

What qualities does red seem to symbolize?

Aden Student

7 days ago

Notes: The garden by the grave features prominently, interesting use of contrast.

Circle = B

Radius = AB, BC, BD

Diameter = AC

Area of a circle:

$$A = \frac{1}{2} \times \pi \times 8^2$$

$$A = 50.26 \text{ cm}^2$$

$$A = \pi r^2$$

$$\therefore \pi \times 2.0^2$$

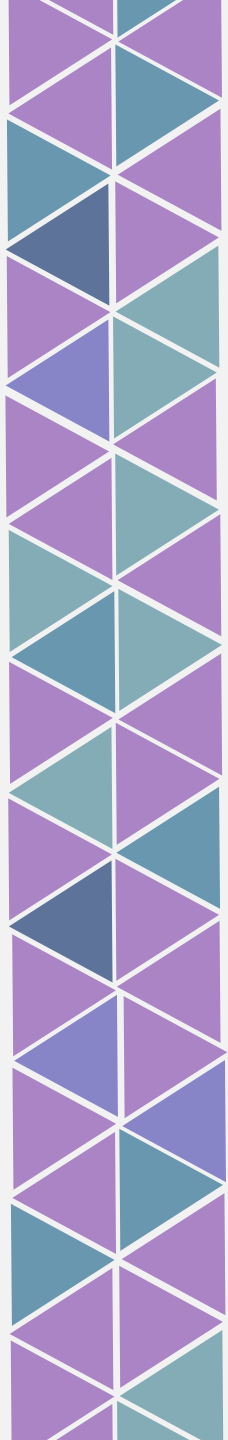

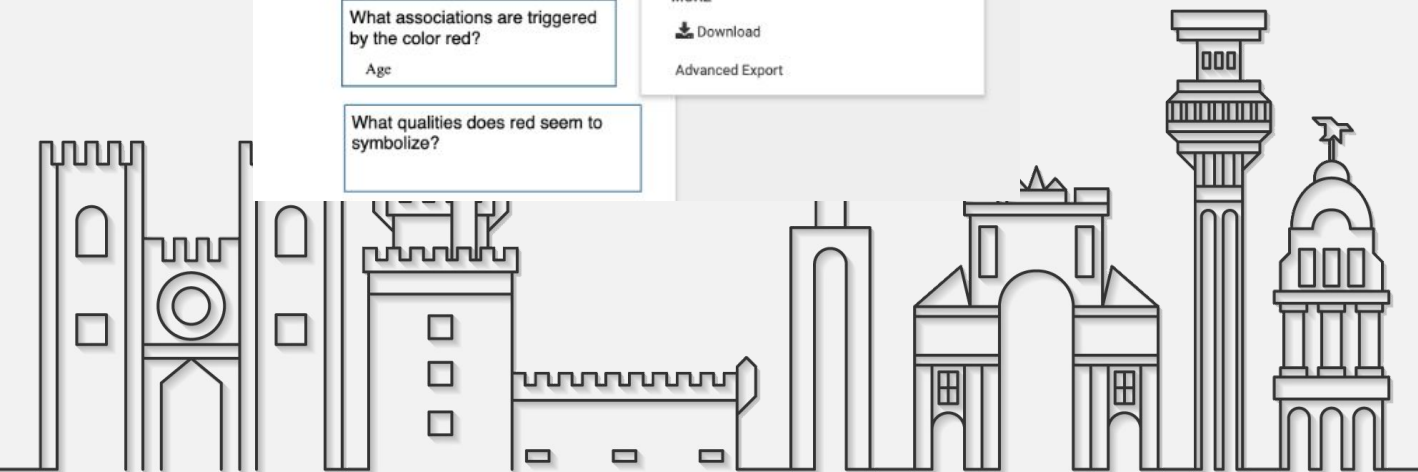

$$A = 26.42 \text{ m}^2$$
