Develop ELMT 2441 and NUCP 2470 Laboratory Curriculum Modules - 96 contact hours / 4:3:3.

Wharton County Junior College was awarded a Nuclear Regulatory Commission Curriculum Development Grant (NRC - HQ-12-G-38-0049), which includes funds to hire an industry subject matter expert (SME) to develop instructional curriculum for the Intelitek Lab Equipment, a hands-on training simulator. The SME:

\* Develop curriculum aligned with NRC guidelines and industry-required student learning outcomes utilizing the Intelitek training equipment, and associated arc-flash, and lock-out/tag-out, for Motor Control Center/Breaker Disconnect Procedural training, and provide instructor training.

\* Make edits to the curriculum as needed based upon the test experience;

\* Submit the curriculum to the Director of the WCJC Nuclear Power Program, who will be part of instructor training.

\*Final required edits (if any) will be incorporated within the project.

\*PPA Pay Hours Calculation.

96 contact hours x 2 = 192 x \$50/hr. = \$9600.00  
08 hours final edits x \$50/hr. = \$ 400.00  
Total = \$10,000.00

\*Work to be completed by May 15, 2017

The NRC funded this curriculum development in order to provide a standardized hands-on course for colleges preparing a workforce for the nuclear industry. WCJC is the author of the curriculum and will teach it within the Nuclear Power Technology Program, but will also share the curriculum nationwide with other schools who wish to incorporate the Intelitek Lab Equipment into training programs.
