

FALL 2022 MITIGATION STRATEGIES

Please see below for information regarding mitigation strategies that will be in place for our Lower School and Upper School programming this fall.

We will monitor current health data and applicable local, state, and national guidance regarding updates to masking requirements or other related protocols.

	Mitigation Strategies
 <p>Social Distancing & PPE</p>	<ul style="list-style-type: none"> Masks are optional for all students (K-12) and staff
 <p>Cleaning & Disinfecting</p>	<ul style="list-style-type: none"> Additional hand sanitizing stations Minimized sharing of high-touch materials and increased cleaning/ sanitation of shared materials
 <p>Health & Wellness</p>	<ul style="list-style-type: none"> A 5-day quarantine (Day 0 is the day of the positive test or onset of symptoms) remains in effect for anyone who tests positive for COVID. Upon their return, students are required to wear a mask for 5 additional days (Days 6-10) Students must avoid activities where they need to remove their masks, i.e. eating near others, on days 6-10; Students will eat in an alternate space away from others on days 6-10 If student/staff tests positive (rapid or PCR test), they must complete the COVID reporting form and follow all quarantine procedures If health conditions dictate, more aggressive mitigation measures - such as closure, masking, or other interruption of a class or program - may be considered
