## Heart Suncatcher Craft

### Materials:

- Colored construction paper
- Transparent contact paper
- Scissors
- Tissue paper

### Instructions:

- Fold a piece of construction paper (we used black) in half. Cut a half heart out along the fold. Open the paper to reveal the full heart.
- Then do the same thing inside that heart, to reveal just the outline of a heart. This will be your suncatcher frame.
- Then, cut a piece of contact paper about the size of the construction paper. Remove the paper backing. Lay the contact paper on the table with the sticky side facing up. Center and press the construction paper frame over the contact paper.
- Now, press your tissue paper pieces (cut small squares, but you can tear pieces or cut into different shapes) to the sticky paper in any arrangement or pattern desired.
- When your design is finished, add a second piece of contact paper to sandwich the collage materials inside. Cut around the heart to create a heart-shaped frame.
