Technology Department

May 2025

Priorities

- ☒ **Priority 1:** Recruiting, Hiring, Coaching, and Retaining High Quality Teachers and Staff to Support Student Outcomes.

We've opened applications for our summer internship program. This is a fantastic chance for students in relevant Career and Technical Education (CTE) fields to dive into the world of technology and gain valuable hands-on experience.

As an intern, they'll get exposure to a range of activities, including hardware repair, installation, and configuration, all while collaborating in a supportive team environment. This internship will run from June 2nd to July 31st.

- ☒ **Priority 4:** Planning, Preparing, and Maintaining Facilities and Environments for Learning.

As our district expands, we're proactively investigating alternative VOIP phone solutions. Our current provider's pricing structure, which scales with each new full-time equivalent (FTE) requiring a phone line, is becoming increasingly expensive. To support our continued growth in a cost-effective manner, we're exploring a licensing model with a fixed annual fee that includes unlimited extensions. This approach would allow us to scale our communications without the exponential increase in our phone bill.
