

December Maintenance Board Report

We have completed HVAC maintenance at all district locations. During this, a couple of repairs were made at the Middle School, and additional follow-up work will be scheduled once the remaining parts arrive.

Our team has also completed the snow removal training. To improve response time and ensure our buildings remain accessible during winter weather, we will be seeking additional outside assistance for snow removal on snow days. This added support will allow our staff to focus on prepping and maintaining school grounds during active snowfall.

With basketball season underway, maintenance staff will also be working on preparing and maintaining our school gymnasiums to ensure they remain safe, clean, and ready for all scheduled activities.
