Mollie Harings, PACE Principal

Maintenance Board Report 11.21.23

The city's woodchip boiler was brought online Monday the 13th and spent a few hours working out a few mechanical items to get it running properly. The downside is that Viking Lumber's woodchip dryer is still not up and running, with no estimated dates set for future deliveries. Opening the schools heat valves and getting the circulation pumps running currently is not really an option. The chips in the bin will, at best, last a few days.

The middle school boiler is not operational yet. The collection hood was received but additional parts that were to be shipped with was not. Working with Nick at 4950 Sales in Anchorage to get answers from Ferguson Industries on why parts are being shipped incomplete.

Some items in the district that maintenance is working on are window replacements at the high school, middle school showers, upgrading the high school mortis locks on interior doors, replacing the high school fuel mixing valve for boiler #01, replacing and fixing faucets in the bathrooms, working on shower pressure issues in the high school locker rooms, rebuilding mechanical circulation pump seals, replacing middle school unit heater fan drives, replacing speed sensors on buses, replacing select cameras in the district, replacing elementary school thermostats and prepping the district and buses for winter.

If there are any questions regarding the district, maintenance or janitorial items, please feel free to ask.

Daniel Nelson
Maintenance Director
CCSD
