July 31st, 2018

RFP#2018-0731

Dear South San Antonio ISD Purchasing Department,

We recently received your RFP for air filter replacements/service and are very excited about the opportunity to bid on such an important project.

We have submitted for your review a BASE BID and an ALTERNATE BID. The base bid is as requested. The alternate is a MERV 11 media system with custom, full length press in frames that completely eliminate air bypass. The antimicrobial filter media is a MERV 11, which exceeds the Tools for Schools filter requirement. We will survey each campus and loan custom built frames at no cost. This system will keep evaporator coils completely clean thus saving money on future coil cleanings. You will notice an annual savings on the bid proposal of over 35% by using our recommended system. From our past experience with school districts, we know that both our BASE and ALTERNATE bids are valuable options to investigate. There may be certain schools that benefit from one system over another, or some buildings that may even use a combination of both systems for optimal performance. Speaking of past experience, we would strongly suggest that you contact each of our references, because past work speaks more than anything that can be written on paper.

Thank you again for your time and for allowing us to submit a bid. We hope you will take the time to thoroughly look through the materials that we have provided, and please do not hesitate to call us with any questions. If interested, we are happy to discuss each option in more depth. We feel that with our experience, knowledge, customer service and products, we can provide the ultimate in filtration solutions to fit your every need. Thanks again for your time!
