Performance Contract Review

Dear Mr. Light,

Campos Engineering, Inc. (Campos) has reviewed the proposal submitted by Ideal Impact, Inc. on October 30, 2019. We reviewed the proposed improvements from an engineering perspective as well as the methodology and calculations related to cost savings.

It is our conclusion that the proposed improvements are sound and compliant with established engineering technologies and practices. These improvements should not negatively impact the operation of the HVAC systems. The methodology and calculations related to cost savings should provide an accurate assessment of the anticipated energy savings, however, Campos makes no guarantee, either implied or explicit, that any savings proposed by Ideal Impact, Inc. will be realized.

Sincerely,

CAMPOS ENGINEERING, INC.

Gabriel Garcia, P.E.
Senior Mechanical Engineer
