

Executive Summary

Prepared for Board of Trustees Meeting

September 25, 2012

Hope, Engagement, and Wellbeing Student Survey Workshop

Board Goal:

I.g., III.d., III.e.

Purpose of Report

The purpose of this workshop is to brief the board regarding an upcoming survey to be conducted with middle school students.

Objectives

The workshop will give a preview of the following:

- Logistics of the survey
- Purpose of the survey
- Indicators assessed in the survey

Operational Impact

Some middle schools may opt for identifying only one or two grade levels to survey rather than the entire schools because of the large student body size and availability of the on-line survey.

Results

Administrators, teachers, and community members will be able to use the collected survey data to construct more holistic strategies for the purpose of creating student success in our schools. Hope, engagement, and well-being data are predictors of success. The data will be directly from a voice that is rarely considered—the student.

Other Options
