

# Special Programs Board Report

## December 2013

### **Special Education:**

We have completed this year's census report, which provides most of the funding for special education. We reported 125 students this year. We will be meeting more frequently as a PLC team in the coming months as we begin file reviews for compliance and continue our work on Common Core IEP development.

SPED Caseload: 126 Students K-12

### **ELL:**

Nothing new to report this month.

### **TAG:**

We continue to work on development of procedures for identification of talented and gifted students within the district. An assessment tool has been selected and work is in progress to purchase this tool and plan for implementation in February.
