Re: Subscription to Educlimber Data Analysis Tool

Recommendation:

It is the recommendation of the Superintendent to enter into a 3-year subscription with Renaissance Learning for the use of their Educlimber Data Analysis Suite at a cumulative cost of \$14,057.56.

Background Information:

As part of our ongoing strategic learning goals and multi-tiered system of support/problem solving process, it is critical to have easy to manage data tools for teachers to analyze students' long-term academic, attendance, and behavioral development. Last year we made a step towards Abre to begin to increase our management of this. Abre has dramatically increased their overall costs of operations. Concurrently, Educlimber, which was our previous tool, has made some significant improvements in management of academic and behavioral data. Due to our long standing history with Educlimber and our unique district size, Educlimber has offered dramatic discounts to ensure our ability to use the tool. Typically, the minimum cost for a district is \$12,500 annually. Educlimber recognizes that this is not possible in a district our size, and has discounted their product approximately 2/3rds to make it available. Additionally, in the proposal, you will see 1,501 students listed as the head count. This is simply the minimum their system will recognize. Educlimber has accounted for this in the discounting. We are looking forward to working with the new tool and bringing it to our staff so as to better identify and meet our students' needs.
