May 8, 2019

During the month of April, Big Sky students were busy with their daily subject assignments and course work. Students are anticipating and appreciating the warmer weather which allows more outside activities and play. The student focus has been on working towards improving and preparing for the SBAC testing. The goal has been to have all students present for the test and to do their very best with positive results.

Our daily attendance has been very good with a 98-99% for a daily measurement. Great Job! The students enjoyed the Easter holiday time and a egg hunt was held sponsored by the Colony, which the students partook of the fast and furious hunt. Cookies and refreshments provided by the Colony topped off the much anticipated week and into the break.

Happenings with the students' daily life saw the Colony increase by one new addition and brought the population up a notch to 118 Big Sky residents. Students are involved in the Colony's operation more so with the spring planting and other important preparations being undertaken now.

The Park Rangers presented a day of animals that are becoming active after the long winter of cold weather, they also did a presentation of the constellations animal figures. Mr. Andreas has been doing weekly visits with his focus on creating and instilling positive behaviours that students can utilize in time of need. Mrs. Conway, school librarian and an assistant, Mrs. Sadie Johnson-Harwood came and helped to continue to organize our library and provide valued reading time for the various grades.

Mr. Willie Sharp-Teacher
