

Action Sheet

MEETING DATE:

September 16, 2020

AGENDA ITEM:

**Discuss and Consider purchase of
Biodefense Indoor Air Protection
System.**

Integrated Viral Protection would like to engage Galveston ISD to pilot and deploy IVP classroom device air filtration technology. The innovation by Monzer Hourani is proven to immediately eliminate 99.999% of airborne SARS-CoV-2 virus.

Research partners in the developments and scientific validation of the air filtration system: University of Houston, Texas A&M, UTMB, Galveston National Laboratory and National Institute of Health.

The recommendation is to support each of our six elementary schools and MECC with six classroom units that are transportable between classrooms. IVP is a sole source vendor.

RECOMMENDATION:

**I move that the Board of Trustees
approve the purchase of no less
than 45 classroom units from
Integrated Viral Protection for an
amount not to exceed \$100,000.**

Kelli Moulton, Superintendent
