INFORMATION SYSTEM

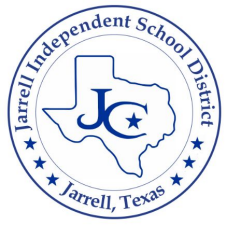

What is a Student Information System (SIS)?

A software system that manages and centralizes all student data and administrative tasks for educational institutions, including admissions, enrollment, course scheduling, attendance, grades, and communication with parents and students.

What is a Student Information System (SIS)?

An SIS automates routine processes, enhances communication between staff, parents, and students, improves data security, and enables data-driven decision-making to support student success and institutional efficiency.

Process for Selection

- ❑ Surveyed other districts to find out which SIS they used and to check their satisfaction level.
- ❑ Committee presentations.
- ❑ Request For Quote (RFQ).
- ❑ Quotes were scored.

Recommendation

Skyward Student Information System
