## AISD Instructional Focus

November 13, 2023

### ALEDO ISD FOCUS DOCUMENT 2023-2024

WHAT WE TEACH

Standards Driven Curriculum

Teaching to the Depth of the Standards

HOW WE TEACH

Focus on 8 Cognitive Skills Thinking Maps

**Fundamental Five** 

Rigor, Relevance, Learner Engagement

Workshop Model

#### AUTHENTIC LITERACY

Cross-Disciplinary Literacy (listening, speaking, reading, writing, thinking)

> Write From the Beginning & Beyond

Culture of Excellence Professional Learning Community

### **Implementation Measures of District Instructional Focus**

PLC Goals Reported Quarterly

Focus on Learning

Goal 91% of CTs by June

#### **Collaborative Culture**

Goal 92% of CTs by June

Focus on Results Goal 87% of CTs by June **District Instructional Priorities** 

**Reported Monthly** 

Lesson Frame Goal 100% of classrooms by June

**Critical Writing** Goal 100% of classrooms by June

#### **FSGPT / Academic Discussion**

Goal 100% of classrooms by June

### **Active Participation**

Goal 100% of classrooms by June

#### **Student-Driven Learning**

\*Monthly report will consist of exemplars, rather than a percentage

#### **Instructional Rounds Data**

\*District Aggregate Data Shared Each Semester

Progress Monitoring Reported BOY, MOY, EOY

CIRCLE Progress Monitoring PK Reading / Math Screener

> mCLASS Texas K-2 Reading Screener

IXL Math K-2 Math Screener

MAP Growth 3-English II Reading Screener 3-Algebra I Math Screener

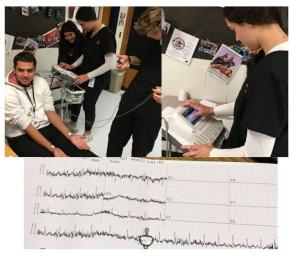

#### **Elementary Campuses**

1st & 2nd GT, Mrs. Garcia, Mrs. Garrett, and Mrs. Moore

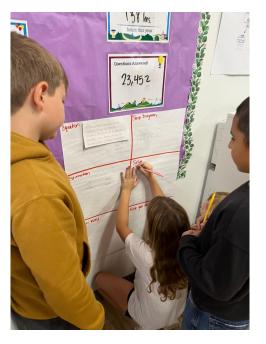

GT students are learning about human body systems and corresponding medical specialists. They examined models of the skeletal system and used real x-rays to diagnose and identify bone fractures like a radiologist. Students also used mirrors to find the line of symmetry in skeletal systems and used materials of their choice to create accurate, symmetrical bones. Once they could identify fractured bones in the skeletal system, students used fractured pool noodles and plaster casting materials to set a bone like an orthopedist! <u>Aledo High School</u> Certified Clinical Medical Assistant Practicum, Mrs. Meador

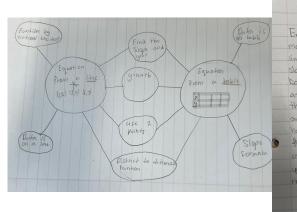

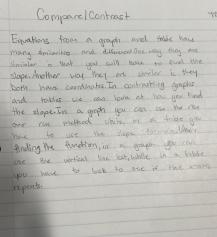

CCMA Students are learning about irregular EKG results, the type of artifacts that can cause these results, and how to prevent the irregularities. Students then worked in small groups to apply their knowledge to create an EKG result displaying a somatic tremor. The groups chose how to create the irregular result and then discussed how to remedy the irregularity so they could run a second EKG using preventative measures.

#### <u>Annetta Elementary</u> 4th Grade Math, Mrs. Howard

#### <u>Campus</u> 7th Advanced Math, Mrs. Eyer

Students in Mrs. Howard's class work together to solve one and two step multiplication word problems. Student's rotated to a new problem every few minutes to analyze, discuss, challenge, and ultimately build on the previous group's work. Students in Mrs. Eyer's class brainstormed the similarities and differences of creating an equation from a graph and creating an equation from a table. They used their group discussion and thinking map to critically write and show their understanding of the topic.

<u>McAnally Middle School</u> 7th Grade Texas History Team

#### <u>Aledo High School</u> AP World History Team

Autopsy of an Empire Project World History students were learning about the empires that died-off from 1750-1900 and created an autopsy report on causes of death. These empires included, the Manchu in Central and East Asia; the Mughal in South and Central Asia; the Ottoman in Southern Europe, the Middle East, and North Africa; and the Safavids in the Middle East.

Students have been learning about the historic figures of the Texas Revolution. In this activity, students learned about a dozen individuals and had to determine which ones they would take a road trip across Texas with and why. They then had to select one of the figures they would not include and write why as a break up letter.

<u>Annetta Elementary</u> 3rd Grade, Stefanie Good

Third grade "detectives" investigated informational texts for missing elements and collaboratively added key text structures that could help readers get the most of these texts.

#### <u>MMS</u> 7th Grade RLA Team

Using locally created data trackers, McAnally's 7th graders reflect on their learning and monitor personal growth on essential literacy skills each time they are assessed.

## Student-Driven Learning: Science

**Elementary Science** 

Kinder: understanding the importance of shelters

1st Grade: designing a device to protect crayons from melting

4th Grade: figuring out how sound moves in waves

4th grade: designing parachutes to figure out what forces apply

#### **Secondary Science**

6th grade: designing investigations to determine how forces act on objects

Chemistry: modeling the geometrical structures of molecules

## A Focus on Learning

1

2

3

A Collaborative Culture and Collective Responsibility

**A Results Orientation** 

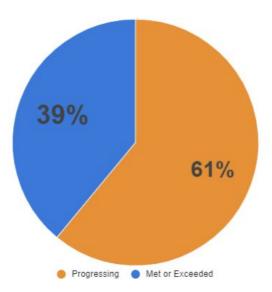

## **FOCUS ON LEARNING**

We acknowledge that the fundamental purpose of our school is to help all students achieve high levels of learning, and therefore, we work collaboratively to clarify what students must learn and how we will monitor each student's learning. We provide students with systematic interventions when they struggle and extension when they are proficient.

| Indicator                                                                                                                                                                                                                                                                   | Initiating                                                                                                                                                                                                                                                   | Implementing                                                                                                                                                                                                                 | Developing                                                                                                                                                                                                                                                                                                                                               | Sustaining                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| We build shared<br>knowledge regarding the<br>TEKS, district documents,<br>and trends in student<br>achievement and work with<br>our colleagues to clarify<br>the criteria by which we<br>will judge student work.                                                          | Teams are aware of the<br>essential learning standards<br>and some teachers use the<br>district curriculum<br>documents consistently.                                                                                                                        | Teams clarify the essential<br>learning standards for each unit<br>and most teacher lessons<br>reflect the decisions made by<br>the collaborative team.                                                                      | Teams clarify the essential learning<br>outcomes by building shared<br>knowledge through deconstruction<br>of the learning standards. All<br>teachers work collaboratively as a<br>team to study and backward<br>design from summative<br>assessments and agree on the<br>specific success criteria students<br>must achieve to be deemed<br>proficient. | Teams possess a deep understanding of the<br>TEKS and the success criteria that students<br>must achieve to demonstrate mastery and use<br>this information to drive instruction. Teams<br>have a systematic process for backward design<br>and are committed to providing students with<br>instruction and support to achieve the intended<br>outcomes, giving every student access to<br>essential learning. |
| We monitor each student's<br>mastery of all essential<br>standards on a timely<br>basis through a series of<br>frequent, standards-based<br>common formative<br>assessments that are<br>aligned with summative<br>assessments students will<br>be required to take.         | Teams have yet to develop<br>formative assessments to<br>monitor student learning.<br>Some teachers use data<br>from assessments to drive<br>instructional decisions.                                                                                        | Teams have begun to create<br>common formative<br>assessments to monitor student<br>learning; however, data is used<br>primarily to make individual<br>decisions about instructional<br>practices.                           | Teams build capacity by creating<br>common formative assessments<br>and using results from common<br>formatives to develop more<br>effective instructional strategies.                                                                                                                                                                                   | Teams determine the effectiveness of instructional<br>strategies based on evidence of student learning<br>rather than teacher preference or precedent.<br>Common formative assessments are used on a<br>regular basis to identify students who need<br>additional time and support for learning as well as<br>provide another opportunity to demonstrate mastery<br>of learning.                               |
| We provide a system of<br>interventions that<br>guarantees each student<br>will receive additional time<br>and support for learning if<br>he or she experiences<br>initial difficulty. Students<br>who are proficient have<br>access to extended<br>learning opportunities. | Opportunities for intervention<br>and extension are left to<br>individual teachers to carry<br>out within their own<br>classrooms. Some teachers<br>attempt to systematically<br>intervene on essential<br>standards when students<br>experience difficulty. | While most teachers see the<br>benefit of systematically<br>grouping students, intervening<br>and extending based on data is<br>not an on-going cycle where<br>teams continually adjust based<br>on most recent assessments. | Teams track each student's<br>proficiency on essential standards<br>and utilize results from common<br>formatives in a timely manner for<br>interventions and extensions.                                                                                                                                                                                | The system for intervention and extension is<br>proactive, fluid, and directive rather than invitational.<br>Achievement of each student is monitored on a<br>frequent basis, and all students are guaranteed<br>access to this system of intervention.                                                                                                                                                        |

## FOCUS ON COLLABORATIVE CULTURE

We are committed to working together to achieve our collective purpose of learning for all students. We cultivate a collaborative culture through the development of high-performing teams.

| Indicator                                                                                                                                                                                                                                                                                                                              | Initiating                                                                                                                                                                      | Implementing                                                                                                                                                                                                                                                                             | Developing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Sustaining                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| We are organized<br>into collaborative<br>teams in which<br>members work<br>interdependently to<br>achieve common goals<br>that directly impact<br>student<br>achievement.                                                                                                                                                             | Teachers are assigned to<br>collaborative teams and are<br>encouraged to work together<br>collaboratively.                                                                      | Teachers work together during<br>collaborative time and share the<br>workload to achieve individual<br>classroom goals.                                                                                                                                                                  | Teachers work interdependently to<br>achieve goals specifically related to<br>higher levels of student<br>achievement and focus their efforts<br>on discovering better ways to<br>achieve common goals for the<br>course or grade level.                                                                                                                                                                                                                                                                                               | The collaborative process is deeply<br>ingrained in the team culture. Teams are<br>self-directed and very skillful in advocacy<br>and inquiry to monitor student<br>improvement.                                                                                                                                                                                                                                                                                                    |
| Structures have been<br>put in place to<br>ensure:<br>1. Collaboration is<br>embedded in our<br>routine work practice.<br>2. We are provided<br>with time to<br>collaborate.<br>3. We are clear on the<br>critical questions that<br>should drive our<br>collaboration.<br>4. Our collaborative<br>work is monitored and<br>supported. | Some team members may<br>elect to work with colleagues<br>on topics of mutual interest.<br>Some team members are<br>co-laboring in an effort to<br>improve student achievement. | Most teams member are clear<br>regarding how they should use<br>the collaborative time. Most work<br>is focused on the Four Critical<br>Questions and/or matters related<br>to teaching and learning. Most<br>teachers believe the team<br>meeting is a productive use of<br>their time. | Team members are assigned<br>roles and honor their collective<br>commitments. Team leaders<br>develop agendas and help lead<br>the collaborative process to<br>ensure topics have a positive<br>impact on student achievement.<br>All work is focused on the Four<br>Critical Questions and/or matters<br>related to teaching and learning.<br>The collaborative process directly<br>impacts teacher practice in the<br>classroom, helping each teacher<br>clarify what to teach, how to<br>assess, and how to improve<br>instruction. | The collaborative team process serves as<br>a powerful form of job-embedded<br>professional development because<br>members learn from one another, identify<br>common problems, and engage in action<br>research. The Four Critical Questions<br>consistently drive the PLC process.<br>Evidence of student learning is<br>transparent among members of the team,<br>and members make judgments about the<br>effectiveness of different practices on the<br>basis of that evidence. |

**A Results Orientation** 

## **FOCUS ON RESULTS**

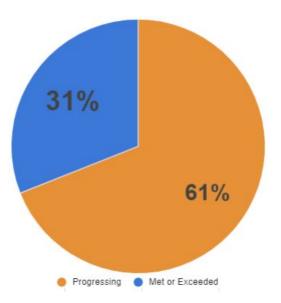

We assess our effectiveness on the basis of results rather than intentions. Individuals, teams, and schools seek relevant data and information and use it to promote continuous improvement.

| Indicator                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Initiating                                                                                                                                                                                                                                           | Implementing                                                                                                                                                                                                                                                                                                                                             | Developing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Sustaining                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
