WAYZATA PUBLIC SCHOOLS

Independent School District 284
Wayzata, Minnesota

MISSION

Our Core Purpose:

The mission of Wayzata Public Schools is to ensure a world-class education that prepares each and every student to thrive today and excel tomorrow in an ever-changing global society.

VISION

What We Intend to Create and Experience:

The vision of Wayzata Public Schools is to be a model of excellence where all students discover their unique talents, develop a love and tenacity for learning and demonstrate confidence and capacity for success through:

Exceptional Student Learning, Experiences and Relationships:

- High achievement by each and every student—no exceptions, no excuses;
- Content-rich, rigorous and personalized education;
- Meaningful relationships with teachers, staff, mentors and peers in a welcoming, nurturing and safe environment where all are valued for who they are and the contributions they make.

Community Trust, Confidence and Partnership:

- Comprehensive learning opportunities meeting diverse learner needs and community aspirations;
- Committed to being the first choice for students and families;
- Maintaining the highest levels of satisfaction and pride by staff, parents and community.

Operational Excellence:

- Attraction, development and retention of exemplary, creative and engaged employees;
- Accountability by all staff for individual and collective performance;
- Effective and efficient use of time and human, financial and physical resources;
- Culture of continuous improvement and responsive innovation;
- High performing district governance, management and partnerships.

RE: Executive Summary of TIES Housing Study 2013

DATE: June 19, 2013

The housing study commissioned from Dick Carlstrom of TIES has been completed as of June 2013. The purpose of this updated housing study was to corroborate the enrollment projection work prepared by Hazel Reinhardt in February 2013 and to determine if the migration into the District is trending up or down from the previous housing study that was completed in 2009. Historical data and current trends are the best indicators for projecting the future.

The characteristics of existing and new families in relation to the purchase of existing and new housing stock has a direct correlation to the District's projected student enrollment. The housing study reviews the number of our current resident students and the percentage that reside in each type of housing (i.e. single-family, townhomes and apartments and across attendance boundaries). In addition, the study finds the yield or average number of children realized when a family purchases an existing home and the yield or average number of children realized when a family purchases a new home. General observations made from the data included in Tables 1- 6 attached to this memo are summarized below:

Housing stock:

- 1) The total single family housing units in the district as of January of 2013 was 14,664 up 495 units from 14,169 in April of 2009.
- 2) Townhouse units and condominiums have increased 128 units from 4800 in 2009 to 4928 in 2013.
- 3) Overall total housing units (not including apartments) are up 632 units.
- 4) Due the boundary shifts, population increases by attendance area are not directly related however, a significant portion of the new houses are in the Greenwood attendance area.
- 5) Although a majority of families live in single-family homes (81%) more of our families live in multi-family units. However in our K-5 population only 76% in live single-family homes and 23% live in other types of housing stock.

Student yield in existing and new homes:

- 1) The overall yield for K-12 students .53 students per home up from .51 in 2009
- 2) The highest yield of students, K-12 occurs in the Kimberly Lane (.99), Greenwood (.70) and the Plymouth Creek (.67) neighborhoods.
- 3) There is a significant difference between homes purchased from existing stock and those purchased new. In homes purchases from existing stock and average of .37 elementary students per home is realized. While new homes purchased realize an average of .48 students per home with Greenwood and Kimberly Lane attendance boundaries realizing .64 and .56 respectively.

Summary Points

- 1) The comparison of the changes between this housing study and the 2009 housing study clearly demonstrate **an increasing trend in the number of students migrating into the District** in ALL housing types.
- 2) Two trends seem to align that appear to affect elementary numbers. One, as new homes are built they realize a greater number of elementary-aged children than existing homes. Two, if trends continue, families with young children appear to be more frequently choosing multi-unit housing, possibly as a means to residency.
- 3) The acceleration of new home construction in the District will have the greatest impact on the elementary grade levels with k-5 yields in new homes averaging .48 to a high of .64 per new home built and sold.
- 4) The results of the housing study supports the reliance of using the high kindergarten/high migration enrollment projections included in the District's Resident Enrollment Projections dated 2/18/2013.
