Purpose/Background:

Bids for the Summer 2023 General Work projects were received at 12:00 PM on Thursday, December 22. There were eight (8) bidders of record; four (4) bids were received. A bid tabulation sheet is attached. The District's architecture firm, StudioGC, analyzed the bids and the qualifications of the bidders and recommend that the contract be awarded to the lowest responsible, responsive bidder, BEAR Construction Company. Their total bid amount is \$1,370,000. This includes a \$100,000 contingency allowance that will be returned to the District, if not used by the end of the project. Contractors were also asked to provide pricing for two alternates which were for solid plastic toilet partitions and BAS controls for all exhaust fans. BEAR stated costs of \$1,775 and \$45,600 respectively, for the alternate work.

Fiscal Impact:

\$1,370,000 (includes \$100,000 contingency)

\$ 1,775 (plastic restroom partitions)

\$ 45,600 (bring all exhaust fans under BAS controls)

=====

\$1,417,375 Grand Total (including both alternates)

This projected was estimated at a cost of \$1,500,000 (including the \$100,000 construction contingency)

Recommendation:

The Facilities Committee concurs with the Administration to recommend to the Board of Education to accept this bid proposal from BEAR Construction for 2023 General Work at Todd Hall and Rutledge Hall including both alternates #1 and #2 in the amount of \$1,417,375 to commence on June 15, 2023 and conclude on August 18, 2023.

RE: 2023 General Work – Todd Hall and Rutledge Hall
Project No. 22066

Dear Mrs. Whited:

Bids for the above referenced project were received at 12:00 p.m. on Thursday, December 22, 2022. There were eight (8) bidders of record; four (4) bids were received. A bid tabulation sheet is herein attached for your review.

We have analyzed the bids and the qualifications of the bidders and recommend that the contract for the 2023 General Work project be awarded to the lowest responsible, responsive bidder, **BEAR Construction Company**. Their total base bid proposal is for \$1,370,000.00. This includes allowance monies in the amount of \$100,000.00 which will be returned to the school district if not used at the end of the project.

Contractors were also asked to provide pricing for two alternates. BEAR Construction Company provided the following prices:

1. Provide solid plastic toilet partitions in lieu of plastic laminate partitions. (+ \$1,775.00).
2. Provide BAS controls on exhaust fans that currently do not have controls. (+ \$45,600.00).

The Facilities Committee may choose to accept or reject any alternates. If alternates no. 1 and 2 are included, BEAR Construction Company's total bid amount equals \$1,417,375.00. If alternate no. 2 only is included, BEAR Construction Company's total bid amount equals \$1,415,600.00.

Bids are aligned with cost estimates and project budget. Studio GC will be at the Facilities Committee Meeting to further discuss the bid results with the committee.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Re: 2023 General Work Todd Hall and Rutledge Hall

To Whom It May Concern:

This letter will serve to confirm that Fidelity and Deposit Company of Maryland /Zurich American Insurance Company, collectively "Zurich", handles the bonding requirements for BEAR Construction Company. Zurich supports BEAR through their writing companies Zurich American Insurance Company / Fidelity and Deposit Company of Maryland, both rated A+, XV by AM Best. Zurich has indicated a willingness to support single projects up to \$50 million subject to an aggregate program capacity of \$200 million. These parameters should not be construed as maximum bonding program limitations; rather they serve to facilitate BEAR's routine project acquisitions.

We can also confirm that no claims have been made on any bonds for BEAR in the last five (5) years.

Should a contract be awarded to and accepted by BEAR, we would anticipate no difficulty in providing the required performance and/or labor and material payment bonds. Our ability to furnish any required performance and/or labor and material payment bonds would be subject to a favorable review of the final contract documents and bond forms. Please note that any arrangement for surety bonds is a matter strictly between BEAR and Zurich and Zurich and Aon assume no liability to third parties if Zurich declines to issue a bond or bonds.

Zurich considers BEAR to be a prominent firm in the construction marketplace with a long history of successfully undertaking and completing a wide variety of project engagements. Should you need any further information, please do not hesitate to contact me.

Sincerely,

It is home to dozens of investigators and students, and houses the Department of Molecular Biosciences including the Keck Biophysics Facility, the Neurobiology Department, and the Materials Science and Engineering Department (MSE). The MSE Project consisted of a multi-phased renovation to 11 Material Science and Engineering Labs across 4 floors. The project commanded heavy logistical planning for critical system shutdowns to the electrical, HVAC, plumbing and building lab gases, while adjacent labs remained open and operational during building renovations. With carefully choreographed phasing, researchers were relocated into completed spaces as the construction progressed over an 18 month period.

Previously owned by the Sisters of the Resurrection Convent, Resurrection College Prep High School has been a historical staple in Northwest Chicago since 1922. When the sister's sold the old convent, they also sold the mechanical house that serviced the high school. To prepare for a Chicago winter, the high school had to convert a portion of their basement into a new boiler room including exterior structural steel and wrapped masonry to protect the system. A completely new mechanical system was installed at the high school featuring a new generator, (4) new heating boilers, (2) new domestic water boilers, a new 12" natural gas service line, a new natural gas booster pump along with a new temperature control system.

Private offices, as well as all conference, huddle and telephone rooms, feature acoustically sealed sliding doors and insulated glass. Acoustic panels and lighting were used throughout to reduce noise levels and enhance the design of the space. The amenities included an open, high-end pantry and gathering space, break-out areas, and gaming spaces. BEAR was able to deliver this project - at the height of the 2020 pandemic - on-time and on-budget, partially due to the tremendous capabilities in virtual management tools we had at our disposal, allowing project teams in four states to participate seamlessly.

Re: BEAR Construction Company – Surety Prequalification

To Whom It May Concern:

This letter will serve to confirm that Fidelity and Deposit Company of Maryland /Zurich American Insurance Company, collectively “Zurich”, handles the bonding requirements for BEAR Construction Company. Zurich supports BEAR through their writing companies Zurich American Insurance Company / Fidelity and Deposit Company of Maryland, both rated A+, XV by AM Best. Zurich has indicated a willingness to support single projects up to \$50 million subject to an aggregate program capacity of \$200 million. These parameters should not be construed as maximum bonding program limitations; rather they serve to facilitate BEAR’s routine project acquisitions.

Should a contract be awarded to and accepted by BEAR, we would anticipate no difficulty in providing the required performance and/or labor and material payment bonds. Our ability to furnish any required performance and/or labor and material payment bonds would be subject to a favorable review of the final contract documents and bond forms. Please note that any arrangement for surety bonds is a matter strictly between BEAR and Zurich and Zurich and Aon assume no liability to third parties if Zurich declines to issue a bond or bonds.

Zurich considers BEAR to be a prominent firm in the construction marketplace with a long history of successfully undertaking and completing a wide variety of project engagements. Should you need any further information, please do not hesitate to contact me.

Sincerely,

Fidelity and Deposit Company of Maryland

BEAR Construction Company was founded in 1984 by three brothers dedicated to doing quality work above all else. 37 years later, those same brothers have built a \$250-million-dollar company based on that same principle, and our family-focused culture still reflects those values. Two of those original founders remain active in our day-to-day operations and are instantly available to any client or employee to provide guidance or address any challenge. BEAR's "Client First" philosophy has allowed us to maintain repeat business from over 80% of our past clients, a figure we gauge our success by.

Our diverse team of professionals, educated and experienced in a variety of sectors, allows us to apply best practices and technology to each and every client. BEAR currently employs licensed in-house professionals to assist with architectural planning, MEP engineering and design. BEAR's full-service Estimating Department is staffed by 8 full time individuals, each having expertise in our various work sectors, allowing us to produce accurate budgets and competitive bids. We place great value and pride in our collaborative Subcontractor relationships, based upon mutual trust, which allow us to tap into the pulse of any market at any time. Real-time pricing allows us to provide a clear and accurate cost analysis to each of our clients.

BEAR is capable of just about any project size or type. Unlike many of our competitors, we will still service a client looking for small-scale work, but we also have the expertise and ability to handle a project as large as the \$1B redevelopment of the 2.75M square foot Old Chicago Post Office. Our ability to provide competitive services, regardless of the project size, is what separates Bear Construction Company from other General Contractors of our size and larger. Our "self-perform" trade staff of carpenters, laborers and painters also allows us to provide responsive client services that many of our competitors cannot. Continuing to service our client needs, regardless of size, has provided us with the opportunities that has made Bear Construction Company what it is today.

§ A.3.3 Does your organization provide design collaboration or pre-construction services? If so, describe those services.

BEAR Construction provides pre-construction services for a majority of our negotiated General Conditions & Fee (GC & Fee) based contracts and all of our Integrated Project Delivery (IPD) clients. Our services are tailor made to each individual client and include:

- Evaluation of existing site and or building conditions
- Thorough constructability review of design documents with the assistance of our in-house architectural & MEP engineering specialists
- Preliminary project scheduling identifying critical path, long lead items, etc.
- Assembly of early design assist packages for long lead items.
- Schematic design and design development cost studies, with cost-tracking comparisons.
- Collaboration with qualified subcontracting partners for real time current market cost solutions
- Evaluation of cost saving and value engineering options

§ A.3.4 Does your organization use building information modeling (BIM)? If so, describe how your organization uses BIM and identify BIM software that your organization regularly uses.

BEAR Construction Company utilizes the BIM 360 Glue system. BIM technology is typically used on our larger and more complex projects, or with clients who require enhanced coordination. Utilizing Revit models provided by the design professionals, we are able to lay out, pre-plan and collaborate with our prime subcontractor partners prior to the start of actual construction, reducing cost, shortening schedules, and identifying potential

constructability challenges. Contractors realize savings in fabrication and field installation time, which drives costs down and compresses the overall schedule to the client's benefit. The end results are lower construction costs, on-time deliveries and streamlining of the entire process.

§ A.3.5 Does your organization use a project management information system? If so, identify that system.

We have primary capabilities with Viewpoint, Procore, Fieldwire and Submittal Exchange with many team members having experience with other platforms hosted by the design or owner's team on a project, such as Procore and Newforma. BEAR is capable of working within any desired platform

- Any person or organization for which the employer has agreed by written contract, executed prior to loss, may execute a waiver of subrogation. However, for purposes of work performed by the employer in Missouri, this waiver of subrogation does not apply to any construction group of classifications as designated by the waiver of right to recover from others (subrogation) rule in our manual.

This endorsement changes the policy to which it is attached and is effective on the date issued unless otherwise stated.
