Memo to School Board

RE: SANB Cardiac Emergency Response Plan (CERP)

Date: April 21, 2026

Minnesota Statutes 2025, section 121A.241 ([Cardiac Emergency Response Plan](#)) states: Beginning in the 2026-2027 school year, a school district or charter school must develop a cardiac emergency response plan consistent with the model plan developed by the commissioner under section [121A.035, subdivision 1](#), for cardiac emergencies that occur on school property.

The SANB CERP complies with this statute and was based on the model plan from MDE with input from the St. Anthony Deputy Fire Chief who will collaborate with us for our required drills. Our SANB Emergency Response Teams will also function as Cardiac Emergency Response Teams and have been trained in CardioPulmonary Resuscitation (CPR) and Automatic External Defibrillator (AED) use. Further training on our CERP will be provided to all staff in the Fall during compliance training.

This statute recommends that AEDs can be accessed within 3 minutes of a cardiac arrest. St Anthony New Brighton Schools currently owns 12 AED units including one (1) at Community Services, two (2) at Wilshire Park Elementary, and nine (9) at the MS/HS building. Two of the AEDs located at the MS/HS building are mobile AEDs that are available to be on location for outdoor athletics. The AEDs are maintained according to best practices and are FDA approved devices that are the same brand as what St. Anthony Fire Department uses. This allows ease of training and a smooth transition in an emergency. They are registered with the national AED registry.

Our CERP will be added to our Emergency Operations Plan red binders located within all of the school district spaces and all staff will be trained on the plan through compliance training in the Fall.

Lori Watzl-King RN, LSN, District Wellness Coordinator

# Cardiac Emergency Response Plan (CERP)

## St. Anthony New Brighton Schools ISD 282

Date Adopted by School Board

Date Revised

### Purpose

This cardiac emergency response plan (CERP) was developed in accordance with [Minnesota Statute 121A.035 - Crisis Management Policy](#) and [Minnesota Statutes 2025, section 121A.241 Cardiac Emergency Response Plan](#).

This adopted CERP should be included in the Emergency Operation Plan (Red Binders) as an addendum.

#### Definitions

automated external defibrillator  
cardiac emergency response plan  
cardiac emergency response team  
cardiopulmonary resuscitation  
emergency medical services  
sudden cardiac arrest

### Definition of Sudden Cardiac Arrest (SCA)

The American Heart Association (AHA) defines sudden cardiac arrest (SCA) as a sudden and unexpected loss of heart function where the heart stops beating due to an irregular heart rhythm in persons who may or may not have been diagnosed with a heart condition. When the heart beats abnormally it affects its ability to pump blood which may lead to cardiac arrest. Without immediate response and treatment, the person may lose consciousness and collapse, leading to death within minutes.

Signs of sudden cardiac arrest may include one or more of the following:

- Not moving, unresponsive, or unconscious
- Not breathing normally (e.g. may have irregular breathing patterns, gasping or gurgling, or may not be breathing at all)
- Seizure or convulsion-like movements

It is important to note that SCA may also occur when a person collapses shortly following a firm, sudden, direct hit to the chest.

### **Forming a Cardiac Emergency Response Team (CERT)**

The school district will designate one or more staff persons as the CERP Coordinator(s) to support the overall development, implementation, and evaluation of a written and practiced plan for cardiac emergencies on school grounds. SANB's CERP Coordinator is the District Wellness Coordinator or Licensed School Nurse/District Nurse.

The school administrator in each building will select a cardiac emergency response team (CERT) that will be trained to respond to emergency medical situations. CERT members should be available and willing adults, preferably certified in CPR and AED use, who are responsible for developing, implementing, and annually reviewing the school's adopted CERP.

School administrators may consider including school nurses, health aides, physical education teachers, athletic directors/trainers, coaches, staff overseeing recess, and any other staff who are present before, during, or after the school day. This team leads the emergency medical response, but it is important that all school staff are familiar with the CERP and their role in responding to a cardiac emergency. As an example, any staff member who witnesses a person unexpectedly collapse should know how to initiate a building's emergency medical response, call 9-1-1 to activate emergency medical services (EMS), and initiate hands-only CPR to an unresponsive person who is not breathing until a CPR-certified team member arrives at the scene.

### **Additional Considerations**

To ensure a timely response, it is recommended that schools consider building CERTs with enough staff members to account for periodic absences and staff turnover. CERT members will be required to step away from their regular job duties to assist in a cardiac emergency and consideration should be given for classroom coverage in those instances.

In addition to establishing team roles and responsibilities, communication is a critical component in the team's efficient emergency response. CERTs should determine a communication plan that includes two-way communication covering all areas of the school's campus, both inside and outside the facility. SANB will use walkies to communicate with other CERT team members and the overhead paging system will be used to communicate with all staff as needed.

Members of this school building's Cardiac Emergency Response Team are listed below:

### Cardiac Emergency Response Team

Staff Name	CPR/AED Certification Date

### Automated External Defibrillator (AED)

#### Equipment

Automated external defibrillators (AEDs) are devices used to analyze the heart's rhythm and, if necessary, deliver an electrical shock, to restore a normal rhythm. AEDs are lifesaving devices designed to be easy to use with visual and audio guidance.

#### Procurement

When purchasing AEDs, SANB will purchase FDA approved devices. Consideration will be given to the brand of devices used by first responders in our community.

#### Placement

AEDs will be stored in an unlocked case and ensure accessibility for people of all abilities with installation in high traffic areas of the school building like cafeterias and gymnasiums. The device's readiness indicator should be facing outward and visible with signage that clearly indicates the location of the device with AED use instructions available in languages relevant to the school community. The American Heart Association recommends, and Minnesota state law requires, that schools place AEDs in accessible locations throughout the campus to allow for retrieval and delivery to the scene *ideally within 3 minutes* of being notified of a potential cardiac emergency vi. Minnesota Statutes 2025, section 121A.241, subdivision 2(2).

SANB has two (2) mobile AED units that are available during Fall and Spring outdoor sporting events and practices held outdoors. AEDs are also located in or next to each gymnasium. Pediatric pads are located in the AEDs in the pool area, the upper gym hallway at St. Anthony

Village High School, the Community Services atrium, and the East and West Gyms at Wilshire Park Elementary (vi). Each AED unit will be equipped with latex-free gloves, razor, scissors, and a CPR barrier mask.

The CERP protocol can be found in the Emergency Operations Plan red binders located in each room/classroom in the school district. Maps that note AED locations are included in the Emergency Operations Plan.

### **Maintenance**

The District Wellness Coordinator or Licensed School Nurse/District Nurse will maintain the AEDs in St. Anthony-New Brighton. Records will be kept of monthly maintenance checks.

### **Registry**

[Minnesota Statutes, section 403.51](#), states that a person who purchases or obtains a public access AED shall register that device with an AED registry within 30 working days of receiving the AED. School districts can register their public access AEDs with the National Emergency AED Registry (NEAR) through the PulsePoint Foundation at [PulsePoint AED](#). St. Anthony-New Brighton's AEDs are registered through the PulsePoint Foundation.

## **Communication of the Cardiac Emergency Response Plan (CERP)**

SANB's CERP will be distributed broadly as a part of the Emergency Operations Plan (in Red Binders) and relevant local emergency responders at the start of each school year. Minnesota Statutes 2025, section 121A.241, subdivision 2(4). School administrators may designate a CERT member as the person responsible for the updating and distribution of the CERP.

## **Integration of Local Emergency Medical Services (EMS) with the School Plan**

School administrators and CERT members will develop and implement the CERP in cooperation with relevant local emergency responders, school district health and safety officials, school nurses, athletic staff, and other members of the school or community medical team. The adopted CERP with locations of onsite AEDs should be provided, along with facility diagrams and site plans to first responders, as requested. Minnesota Statutes 2025, section 121A.241, subdivision 2(4). SANB's CERP, training, and drills are completed in cooperation with the St. Anthony Fire Department.

## **Training for CPR and AED Use**

School staff and coaches will review the school's CERP annually during compliance training and be encouraged to learn Hands-Only CPR and AED use. These efforts ensure a coordinated and rapid response to cardiac emergencies within the school setting.

**CPR Training**

Training is the educational process of learning how to recognize sudden cardiac arrest, perform chest compressions (Hands-Only CPR), and use an AED. School staff and coaches are encouraged to participate in annual CPR and AED education to strengthen school-wide readiness and ensure a timely response that meets CERT roles of CPR initiation, AED retrieval, and 911 notification. Annual training should include review of the CERP, recognizing the signs of cardiac arrest, understanding how to initiate the emergency response team, and knowledge of where AEDs are located inside and outside the building (i, vi).

**CPR certification**

Certification formally recognizes a person's proficiency in performing CPR and AED use. Certification is obtained through a nationally recognized organization, such as the American Heart Association, the American Red Cross, among others, and includes written and in-person hands-on testing. SANB will offer CPR certification training for all CERT members and coaches every two years.

**Practice Drill for Cardiac Emergency Response**

The CERT members will participate in an annual drill in coordination with the St. Anthony Fire Department. This drill can include a tabletop exercise. The drills allow the response team time to practice key elements of the plan including effective communication, availability of CPR/AED certified responders, identification of roles and responsibilities, access to AEDs, and coordination with onsite and community medical responders.

**Annual Review of the Plan**

School Boards are required to conduct an annual review and evaluation of the CERP, focusing on ways to improve the effectiveness of the plan. Minnesota Statutes 2025, section 121A.241, subdivision 2(6). This evaluation may include post-event feedback from after-action reviews. Annually, the District's CERP Coordinator(s) and building CERT members should review and update the CERP based on current evidence-based best practices for responding to a cardiac emergency.

**CPR and AED Instruction for Secondary Students**

Minnesota Statutes, section 120B.236, states school districts must provide onetime cardiopulmonary resuscitation and automatic external defibrillator instruction as part of their grade 7 to 12 curriculum for all students in that grade beginning in the 2014-15 school year and later. Training and instruction under this section need not result in cardiopulmonary resuscitation certification; <https://www.revisor.mn.gov/statutes/cite/120b.236>.

## Protocol for Cardiac Emergency Response

Although most school staff do not have a background in the medical field, it is possible that a situation will arise that requires quick action from staff to successfully respond to a medical emergency. This protocol provides step-by-step guidance that all staff can follow in an event of a cardiac emergency. Immediate action is critical when responding to a sudden cardiac arrest event. Schools should identify the closest medical facility that is equipped in advanced cardiac care and considerations may be given to obtaining on-site ambulance coverage for higher-risk athletic events.

Scenario: A person is found on the ground, not responding to verbal prompts or physical touch. The person is observed to have abnormal breathing (irregular breaths, gasping, or not breathing at all), and may begin to show seizure-like movements or convulsions. You need to take immediate action.

1. Recognize signs of SCA (may include one or more of the following).
  - a. Not moving, unresponsive, or unconscious
  - b. Not breathing normally (e.g. may have irregular breathing patterns, gasping or gurgling, or may not be breathing at all)
  - c. Seizure or convulsion-like movements
2. The first school staff to observe the unresponsive person designates another adult to call 9-1-1.
  - a. Provide school building address
  - b. Explain person's condition/symptoms
  - c. Listen carefully to the dispatcher for additional guidance
  - d. Stay on the line and answer dispatcher questions
3. Once 911 has been called, activate the cardiac emergency response team (CERT) immediately using the communication plan outlined in the CERP. Use a calm, clear voice to call the office and state, "**There is a cardiac emergency in [name specific location within the building] and 911 has been called.**"
4. The school staff that finds the unresponsive person should also designate someone to retrieve and deliver an AED from the nearest location to the emergency. Often a team member enroute to the scene can retrieve the AED the fastest.
5. The first school staff at the scene of the emergency should start CPR (bystander, hands-only CPR if not CPR certified is an effective way to buy time and increase chance of survival until a CERT member or EMS arrives on scene).
  - a. Place the person on their back on a firm flat surface.
  - b. Using 2-hands place the heel of one hand in the center of the chest, on the lower half of the breastbone, with the other hand directly on top (or one hand for

smaller children), pushing hard and fast to a depth of about 2 inches (or one-third the depth of the chest for smaller children). You can lift or interlock fingers to keep them off the chest.

- c. 100-120 compressions per minute, allowing the chest to rise fully between compressions.
  - d. If you are able and willing to provide rescue breaths, use a CPR barrier mask and provide 2 breaths after 30 compressions.
  - e. Continue compressions until help arrives.
6. School administrators or office staff should follow communication procedures within the crisis management policy for placing the school in a “hold” for medical emergency, and alert CERT using a two-way communication system to the location of the medical emergency.
  7. CERT members should report to the emergency location and respond based on roles and responsibilities assigned, ensuring CPR certified staff remain on scene and additional staff are securing the location and available at entry points to quickly direct EMS personnel to the scene.
  8. When the AED arrives, turn the device on immediately.
  9. Follow the AED’s visual and audio prompts for pad placement and shock advisement. Note: the AED will only deliver electrical shocks if advised by the device. Continue CPR, rotating staff doing chest compressions as needed, until the person becomes responsive, or EMS takes over.
  10. Transfer care to EMS upon their arrival reporting the time the unresponsive person was found and when CPR began.
  11. A CERT member should be designated to document the emergency, noting the time the event began, when CPR was initiated, when and if the AED delivered a shock, the time EMS arrived on scene and assumed control of the emergency response, and the person’s condition when care was transferred to EMS.
  12. A school administrator or designee will notify emergency contacts for the unresponsive person.
  13. Medical providers evaluating the person following the emergency response may request information about what the person was doing at the time of the event as well as retrieval of data from the AED to determine proper treatment. EMS personnel may request that the school send the AED with the person to the hospital. SANB will work with our fire department to recover the AED from the hospital.

14. CERT members should allow for time following the event to debrief the outcome of the cardiac emergency and complete an after-action review to identify successes and areas for improving future emergency medical response, updating plans and protocols accordingly. School boards are required to annually review and evaluate the effectiveness of the plan.
15. District mental health team members will work to identify any students and staff who may need support following this cardiac crisis. Additional support will be provided to those identified.

## Fiscal Year 2026-27 Initial Budget Assumptions

Apr 21, 2026

### Revenues:

- **Student Enrollment:** We are projecting 1,900 students for the district's enrollment, which includes 10 ECSE and 1,890 K-12. We are also projecting a negative adjustment of 60 ADM due to students participating in the Post Secondary Enrollment Options program. As a result, 1,840 ADM will be used for the 2026-27 budget.

Grade Level	Oct 1, 2025 Enrollment	2026-27 Enrollment Target	2026-27 Enrollment Budget
K-5	708	710	689
6-8	448	450	444
9-12	762	800	757
ECSE	7	10	10
PSEO Adj	-61	-60	-60
<b>Total</b>	<b>1,864</b>	<b>1,902</b>	<b>1,840</b>

- **General Education Basic Funding:** MN Statutes 2024, section 126C.10, subdivision 2 sets the general education formula allowance based on the actual Consumer Price Index (CPI). The final adjusted allowance will increase by 2.69% from \$7,481 to \$7,683 per Adjusted Pupil Unit (APU). Pupil units are calculated using a weighting factor of 1.0 for ECSE, kindergarten through 6th grade, and 1.2 for grades 7-12. The estimated basic general education revenue for 2026-27 is \$15,662,564 ( $\$7,683 \times 2,038.6$  APU).
- **Special Education Aid:** The district special education aid for FY2027 is estimated based on this year's estimated expenditures. Total special education aid projected next fiscal year is \$4.5 million, with approximately \$1.06 million for special education transportation. This estimate will change when we have a better projection of this year's expenditures.
- **Operating Referendum Levy:** The operating referendum levy remains at \$2,543.86 per APU, generating \$5,743,810 in revenue. However, the total levy revenue for next fiscal

year is projected to be 4% lower than the current year's budget due to adjustments for prior year enrollment and Tax Increment Financing (TIF) revenue collected in the prior year. Levy revenue tied to enrollment is trued up in subsequent years when actual student counts become available, which can increase or decrease the district's levy authority.

FY 2027 levy revenue is lower because the district received an excess TIF distribution in 2024. Since the revenue is from property taxes that are outside of the district's levy authority, the state reduces the allowable levy for the Pay 2026 levy.

- **Capital Projects Referendum Levy:** The approved capital projects referendum levy revenue for 2026-27 is \$1,055,082. This revenue will be spent on technology and curriculum needs.
- **Professional Development:** The district will continue to set aside 2% of the basic general education state revenue for staff development. This amounts to approximately \$313k for 2026-27.
- **Achievement and Integration Program:** The district submitted 2-year (FY2026-27 and FY 2027-28) application and budget to MDE in March. The FY27 initial revenue for this program is \$299k.
- **Federal Grants:** The district will continue to receive ESEA (Title I, II, III and IV) and Federal Special Education Grants in 2026-27.
- **ADSIS:** This is the 2nd year of the approved School Fiscal Year 26-27 program and the district will continue to receive funding for the ADSIS program.
- **Local Sources:** Increase interest income for FY27 because more interest earnings are received this year.
- **EL Cross-Subsidy Aid:** Starting in fiscal year 2026-27, districts will receive 25% of the district's EL cross-subsidy. FY26-27 EL cross-subsidy aid will be calculated based on the FY2024-25 district's cross-subsidy expenditures. We are expecting to receive \$32k in EL cross-subsidy aid.

### **Expenditures:**

- **Staffing:** Due to an increase in students requiring special education services, administration would like to increase 1.5 FTE to special education.
- **Salaries:** Salaries for all employees will be budgeted according to the terms of settled bargaining unit contracts. For contracts that are not yet settled, the budgeted salaries will align with the parameters established by the School Board.

- **Health Insurance:** Health insurance premiums are expected to increase by 30% in FY2026-27. The district's contribution for health insurance premiums is budgeted based on the settled teacher's contract.
- **Utilities:** Utilities such as gas/fuel, electricity, and water will increase by 5.5% in the budget.
- **Purchased services:** Budgeting for purchased services contracts will be based on the terms of the negotiated agreements.
- **Other expenditures:** Expenditures not indicated above will be increased by the same percentage as the general education formula allowance increase.
