STANDARD TERMS AND CONDITIONS**

THIS NON-EXCLUSIVE STUDENT AFFILIATION AGREEMENT (this “Agreement”) is entered into by and between Facility and School, each as defined on the attached Face Sheet.

RECITALS:

- A. School operates a Nursing Program for nursing students (“Students”) and desires Students to gain experiential training through clinical experiences.
- B. Facility operates a healthcare facility and has established clinical practices where Students from the School may gain clinical experience and training that includes the application of knowledge and skills in actual patient situations.
- C. Facility, possessing the requisite experience, expertise and personnel, desires to extend a courtesy to the School by providing clinical experiences and training to Students of the School’s Nursing Program, subject to the terms and conditions stated herein.
- D. This Agreement is entered into for the purpose of defining the parties’ respective rights and responsibilities.

AGREEMENT:

NOW, THEREFORE, in consideration of the mutual terms and conditions set forth in this Agreement, the parties, intending to be legally bound, agree as follows:

1. JOINT RESPONSIBILITIES OF THE PARTIES

- A. Facility and School shall provide contact persons, each as defined on the attached Face Sheet, to coordinate and oversee Students’ clinical training.
- B. Facility and School shall mutually agree upon a set term of training for the Student’s clinical training and the number of Students per rotation, each as defined on the attached Face Sheet.
- C. Facility and School shall mutually agree upon the clinical training goals and objectives, as set forth in Exhibit A. Facility shall determine the Patient Care Services, as set forth in Exhibit A, to be provided by Students during clinical training.
- D. School shall maintain ultimate responsibility and authority for the quality of the Nursing Program for Students, and School shall maintain such requirements as required for accreditation by the Accreditation Commission for Education in Nursing. Facility shall reasonably cooperate with School in complying with any reasonable requests of such accrediting agency. Facility shall comply with any Accreditation Commission for Education in Nursing requirements regarding Student supervision and educational requirements for clinical training for Students. Failure of either party to maintain such respective responsibilities and requirements may result in immediate termination of this Agreement.
- E. School shall be responsible for selecting Students who will participate in clinical training at Facility pursuant to this Agreement; provided, however, that Facility may in its sole discretion decline rotation by any Resident. Facility may make recommendations to School regarding the selection, retention and disciplining of such Students. Facility reserves the right to refuse acceptance of any Student when it is determined by Facility in its sole discretion that further participation by any Student would not be in the interest of Facility.

- F. School and Facility shall review Students' background checks and substance abuse testing results, and Facility shall be solely responsible for determining if Students may participate or remain in the program based upon results of such checks and testing.

2. SCHOOL'S RESPONSIBILITIES

- A. School and Program Director shall coordinate with Facility to assign Students and plan the clinical training program. Only Students who meet School's criteria for eligibility, which must be Facility-approved, shall be eligible for rotation to Facility.
- B. School shall, *prior* to referring Students to Facility, be responsible for Student compliance with and education about clinical safety, including those regulations issued by the Occupational Safety and Health Administration governing exposure to blood borne pathogens and tuberculosis transmission prevention. Such responsibility shall include, without limitation, providing Students with information and training about the hazards associated with blood and other potentially infectious materials, the protective measures to be taken to minimize the risk of occupational exposure of blood borne or airborne pathogens, and the appropriate actions to take in an emergency involving exposure to blood and other potentially infectious materials.
- C. School shall notify Facility if any Student fails to meet education and/or training requirements at any time during the terms of this Agreement.
- D. School shall obtain written documentation from Students and staff and provide Facility with such documentation for the following, *prior to* referring them to Facility:

School shall not present any Student for rotation to Facility whose medical licenses or certifications has ever been suspended, revoked, terminated, or otherwise modified as to rights and privileges. If such sanctions resulted from controlled substance use, and Student has successfully completed a rehabilitation program, School may refer such Student so long as he or she undergoes periodic substance abuse testing as determined by Facility.

(3) Criminal Records Check.

Students' criminal records shall be checked at the federal, state, and local levels *before* a Student is eligible for rotation to Facility and thereafter as often as is required by law. Facility CEO will have the authority to make the final decision regarding acceptance by Facility of a Student with a criminal record. Students must execute a Student Background Consent Form as set forth in Exhibit E.

(4) Other Background Checks Required By Law as set forth in Exhibit C.

- H. School shall not circulate or publish any of Facility's materials related to this Agreement without the Facility's prior written consent.

- F. Through the Clinical Supervisor, supervise and be responsible for the daily clinical training of the Students to ensure that each Student fulfills the requirements of clinical training in accordance with the goals and objectives of clinical training as set forth on Exhibit A.

4. TERM AND TERMINATION

- A. This Agreement shall be effective upon the Effective Date as set forth on the Face Sheet and may be renewed upon the parties' mutual agreement.
- B. Facility or School may terminate this Agreement, without cause, by giving thirty (30) days' written notice to the other party. Upon such termination, the parties will, if practicable, attempt to allow any Students then on clinical rotations at Facility to complete that clinical experience.

- C. Facility or School may immediately terminate this Agreement if the other party is insolvent or bankrupt or upon a breach of a material term of this Agreement by the other party.

5. INSURANCE

- A. Documentation of the following shall be provided to Facility *prior to* School sending Students to Facility:
 - 1) Students have health insurance acceptable to Facility during their clinical rotation;
 - 2) Clinical instructors and other School staff present on Facility grounds have worker's compensation insurance (or, if School is government entity, School shall maintain the government version of such insurance); and
 - 3) Students have general and professional liability as described in this Section 5(B) hereof.
- B. School agrees to provide Students with general and professional liability insurance with minimum limits of one million dollars (\$1,000,000) for each occurrence and three million dollars (\$3,000,000) annual aggregate to cover the acts and omissions of Students, including legal representation and expense of defense of any such liability claims, actions or litigation, while on clinical training at Facility. This coverage may come from any source, but shall clearly cover all acts and omissions of Students related to their participation under this Agreement at Facility. If Facility discontinues such malpractice insurance, it will obtain tail coverage related to the discontinued policy or a prior acts endorsement in the new insurance to provide continuity of coverage without regard to when a claim is filed.
- C. If Students' professional liability coverage is written on a "claims made" basis, such coverage shall outlive this Agreement for at least twenty-four (24) months (which may require tail or prior acts coverage). The "retro" date for coverage shall be the Agreement's Effective Date.
- D. Facility shall be notified in writing within fifteen (15) days of any material alteration, cancellation or nonrenewal of any insurance coverage. Inadequate insurance or proof of insurance shall be grounds for immediate termination of this Agreement.

6. CLAIMS, INDEMNIFICATION AND NOTIFICATION

- A. Each party shall pay its portion of all claims, liability, costs, expenses, demands, settlements, or judgments resulting from negligence, actions or omissions of itself or its own representatives, directors, and employees relating to or arising under this Agreement.
- B. School shall defend, indemnify and hold harmless Facility and its officers, directors, employees, affiliates, agents, parent and subsidiaries, from and against any and all claims, demands, actions, settlements, costs, damages, judgments, liabilities, and expenses of any kind (including settlements, judgments, court costs, and reasonable attorneys' fees and expenses actually and reasonably incurred, regardless of the outcome of such claim or action) arising out of or resulting from, (i) School's or a Student's gross negligence or willful misconduct in performing any of its obligations under this Agreement, or (ii) a material breach by School under this Agreement. Facility specifically reserves any common law right of indemnity and/or contribution which it may have against School. This Section shall survive the termination or expiration of this Agreement for any reason. This Section does *not* apply to government entities that claim full or partial governmental immunity as described in Exhibit G.
- C. School shall complete Exhibit G if claiming governmental immunity. *If* School claims any type of governmental immunity or is limited in its ability to compensate Facility for any damages, School shall provide to Facility a list of alternative insurance, monetary, and/or other relief that will be

available to Facility. Legal or equitable relief from Facility is the same as that available to Facility from School.

- D. The parties will notify each other as soon as possible, in writing, of any incident, occurrence, or claim arising out of or in connection with this Agreement which could result in a liability or claim of liability to the other party. Facility shall have the right to investigate any incident or occurrence and School shall cooperate fully.

7. CONFIDENTIALITY AND PATIENT PRIVACY

- A. Each party will comply with its obligations with respect to patient privacy and confidentiality (including clinical training of Students), including without limitation, those requirements imposed by the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), and the Health Information Technology for Economic and Clinical Health Act ("HITECH"), as may be amended from time to time. School, its employees, representatives and Students agree to keep confidential from third parties all information which relates to or identifies a particular patient, including, but not limited to name, address, medical treatment or condition, financial status, or any other personal information which is deemed confidential according to applicable laws. School shall ensure that all Students also comply with these requirements. Further, patient records are and shall remain Facility property. Retention and release shall comply with all applicable laws. Access to and use of patient information is restricted to only that necessary for this Agreement. This Section shall survive the termination or expiration of this Agreement for any reason.
- B. School acknowledges and agrees that in connection with this Agreement, School and the Students may acquire competitively sensitive information which is neither known to nor ascertainable by persons not engaged with Facility and which may cause Facility to suffer competitively or economically if such information becomes known to persons outside of Facility. Confidential Information shall include Facility's business and business development plans, patient or supplier lists, and other documents clearly labeled as "confidential" on their face (collectively, "Confidential Information"). Consequently, except as provided in this paragraph or unless otherwise required by applicable law, School agrees, and shall require the Students to agree, not improperly to use or disclose any Facility Confidential Information, as long as such information continues to qualify as Confidential Information, unless consent to disclosure is granted by Facility. This Section survives the termination of this Agreement.

8. NOTICES. Notices or other communications per this Agreement shall be given to the other party as follows:

If to Facility: As stated on Face Sheet.

With a copy to: DRHSI, Inc.
600 Mary St.
Evansville, IN 47747

If to School: As stated on Face Sheet.

9. ASSIGNMENT OF CONTRACT AND BINDING EFFECT. School shall not assign this Agreement or any portion hereof and shall not delegate any duties under this Agreement, without the prior written consent of Facility, which consent may be withheld for any reason or for no reason. Facility may assign all or any portion of this Agreement to an affiliate of Facility or other assignee by providing written notice to School, which assignment will forever release Facility as to any future obligations hereunder.

10. NON-DISCRIMINATION. Each party shall comply with all applicable laws relating to discrimination, harassment and retaliation which may include those such as Title IX of the Education Amendments of 1972, the Rehabilitation Act of 1973, and the Americans with Disabilities Act, all as amended. Further,

when carrying out this Agreement, each party agrees not to discriminate on the basis of religion, race, sex, gender identity, national or ethnic origin, color, age, income, disability, sexual orientation, ancestry or veteran status and other legally protected classifications.

11. **INDEPENDENT CONTRACTOR STATUS.** Each party is an independent party and not an agent or representative of the other party, and therefore has no liability for the acts or omissions of the other party. In addition, neither party, nor any of its employees, agents, or subcontractors, shall be deemed to be employees or agents of the other party. Therefore, neither party nor any of its employees, agents or subcontractors, shall be entitled to compensation, worker's compensation, or employee benefits of the other party by virtue of this Agreement.
12. **USE OF NAME.** Neither Party shall use the name, logo, likeness, trademarks, image or other intellectual property of the other party for any advertising, marketing, endorsement or publicity without the prior written consent of an authorized representative of the other party as to each such use.
13. **COUNTERPARTS.** This Agreement may be executed in one or more counterparts and may be electronically transmitted, and be as effective as an inked original.
14. **CONSIDERATION.** Consideration for this Agreement is the mutual promises contained herein. No compensation shall exchange hands between the parties.
15. **GOVERNING LAW AND VENUE.** This Agreement shall be governed by and interpreted under the laws of the State of Facility's principal location.
16. **ENTIRE AGREEMENT, WAIVER & SEVERABILITY.** This is the parties' entire agreement on this subject matter and it supersedes any prior agreements/arrangements. This Agreement cannot be amended, modified, supplemented, rescinded or waived except in a writing signed by each party. The waiver of any breach of any term of this Agreement does not waive any subsequent breach of that or another term of this Agreement. The provisions of this Agreement are severable, and if any provision of this Agreement is found to be invalid, void or unenforceable, the remaining provisions will remain in full force and effect.

RE: Bid Exception Under 805/3-27.1(1) – Sole Source

I recommend that the Board of Trustees authorize the purchase of the Systran Polaris HOT Model 1 Process Operations Trainer as a strategic academic and workforce development investment. This unit would be a key feature in the newly constructed Technology Center at the Lincoln Trail campus. The unit would position IECC as a regional leader in process technology, industrial maintenance, instrumentation, and advanced training while directly supporting employer workforce needs throughout southeastern Illinois and the surrounding region. The trainer is designed as a full-scale, industrial process system featuring pumps, tanks, heat exchangers, instrumentation, control valves, and a DeltaV distributed control system (DCS), providing students with hands-on experience in operating an actual process plant environment rather than a desktop simulation.

Community colleges, including IECC, frequently invest in maintenance trainers or process control training stations. Far fewer institutions possess a full-scale process operations training unit capable of teaching startup, shutdown, troubleshooting, emergency response, control room operations, and field operations on a single integrated platform.

The HOT Model 1 includes more than 100 exercises and operational scenarios and is specifically designed to teach process operations fundamentals through hands-on instruction. This would create a highly marketable and differentiating academic and workforce training asset for IECC.

The trainer creates opportunities for:

- Contract training agreements
- Incumbent worker training
- Industry certifications
- Customized workforce programs
- Apprenticeships

Employers frequently struggle to provide training on operating systems because production equipment must remain online. A dedicated training plant allows workers to train in a realistic but controlled environment without production risk.

The Systran HOT Model 1 is not merely instructional equipment; it is a workforce development platform that replicates a real industrial process plant. Acquisition would position IECC as a regional leader in process operations and advanced training, strengthen business and industry partnerships, support workforce development objectives, and create opportunities for external funding and customized employer training.

I ask the Board to approve the quote of \$772,970 for the purchase of the HOT Model 1 from Systran Custom Learning Solutions. Systran Custom Learning Solutions is the only provider of the HOT Model 1. Funding for this purchase is made available from the IECC budget of \$500,000 and the Lincoln Trail College Foundation of \$272,970.

RE: Approval of One-Year Renewal Agreement with Instructure, Inc. for Canvas LMS and Canvas Studio

Administration recommends approval to enter into a one-year renewal agreement with Instructure, Inc. for continued use of Canvas LMS and Canvas Studio for the period July 1, 2026, through June 30, 2027, at a total cost of \$93,830.80. This cost represents a 7% increase for the renewal.

Canvas is IECC's current learning management system platform. The current agreement with Instructure expired June 30, 2026, and the renewal covers both the Canvas LMS Cloud Subscription and Canvas Studio Cloud Subscription. Pricing for the Canvas LMS is based on a full-time equivalent student count pulled from IPEDS. The one-year renewal includes 2,914 FTE at a cost of \$32.20 per FTE. Based on current data, a one-year term is recommended at this time due to the anticipated decline in FTE.

I ask the Board to approve the one-year renewal agreement with Instructure, Inc. for Canvas LMS and Canvas Studio for the period July 1, 2026, through June 30, 2027, in the amount of \$93,830.80, and authorize Administration to execute the agreement.

MEMORANDUM

TO: Board of Trustees

FROM: Cathy Robb

DATE: July 21, 2026

RE: Approval of Chancellor Vehicle Lease-Purchase Agreement

Following the June Board of Trustees meeting, Administration began evaluating purchase options for a District owned vehicle for the Chancellor. The provision of a vehicle is a contractual obligation contained within the employment agreement for Chancellor Dr. Timothy Taylor. The proposed acquisition fulfills that contractual commitment and supports the Chancellor's transition into the district prior to his start date in August 2026.

A quotation was obtained from LeMond's Chrysler Center for a 2026 Ram 1500 Limited Crew Cab 4x4 at a total acquisition cost of \$68,469, including applicable fees. The acquisition cost is within the amount previously authorized by the Board at the regular June meeting.

I recommend utilizing the tax-exempt lease-purchase financing proposal provided by Stellantis Financial Services. Under the recommended financing structure, the district will finance the vehicle over a three-year term with annual payments. The financing proposal provides:

- Acquisition Cost: \$68,468.63
- Financing Term: Three (3) Years
- Annual Payment: \$24,832.55
- Interest Rate: 9.08%
- Residual Value: None (ownership contract)

Board approval at this meeting will allow the District to complete financing and delivery activities in advance of Dr. Taylor's start date. The financing proposal requires payment by July 28, 2026, to preserve the quoted financing terms.

Proposed Board Action

I ask the Board to authorize the Treasurer to execute all related purchase and financing documents for the acquisition of a 2026 Ram 1500 Limited Crew Cab 4x4 through a three-year tax-exempt lease-purchase agreement with Stellantis Financial Services at a total acquisition cost of approximately \$68,469.

WVC TENNIS COURT RECONSTRUCTION SPECIFICATIONS

HMA SPECIAL PROVISIONS

This work shall consist of constructing a 1-1/2" thick hot mix asphalt surface course on a 1-1/2" thick hot mix asphalt binder course on a 4" thick compacted crushed stone base placed over the existing court surface. The work shall be constructed in accordance with the plan drawings, the "American Sports Builders Association Asphalt Guidelines" (attached and made a part of this document), and the applicable portions of the USTA "Tennis Courts Construction and Maintenance Manual" 2024 edition.

Asphalt for Athletic Uses

The Hot Mix Asphalt (HMA) shall be manufactured from a state approved and certified HMA plant. The following documents will be required to be submitted to the Owner:

1. Approved vendor certificates.
2. A Quality Control manual for production oversight and testing measures performed both at the asphalt plant as well as on the job site.
3. A List or Organizational Chart showing the personnel responsible for use of equipment and actions of the crew while paving and compacting the asphalt.

It will be imperative that all documents list a "Person in Charge" who is responsible for the oversight of the construction. This individual will be the point of contact for the Owner and shall work with the Owner to ensure specification compliance. This individual shall be knowledgeable in all aspects of asphalt design, production, and installation and shall be an employee of the paving Contractor.

The low volume surface course shall be constructed with fine-grade, 1/2" maximum aggregate particle size (Nominal Maximum Aggregate Size of 3/8") or smaller.

A Prime Coat of emulsified asphalt shall be placed on the aggregate base prior to the placement of the binder course and a Tack Coat of emulsified asphalt shall be placed on the prepared surface of the binder course prior to the surface course placement.

Materials

Prime Coat: this shall be an MC-30 placed at a rate of 0.10 gal/sq yd or as directed by the Engineer.

Tack Coat: this shall consist of HFE-90 oil to provide a 0.05 gal/sq yd residual asphalt content. Hot Mix Asphalt (Low Volume).

Aggregate, mineral filler, and asphalt binder shall meet or exceed the requirements of the Illinois Department of Transportation "Standard Specifications for Road and Bridge Construction" adopted January 1, 2022. The coarse aggregate shall be sound, angular crushed stone or crushed gravel. The fine aggregate shall be well graded, moderately sharp to sharp (angular) sands. No recycled concrete is allowed in the mixture.

The HMA mix design shall be performed in accordance with the Asphalt Institute Manual Series #2 (MS-2), current edition. The HMA mix design developed shall meet the requirements of one of the following for compactive effort in the laboratory:

1. Marshall, 50-Blow
2. Hveem, Low Volume Mix

The HMA Mix Design shall be performed by qualified personnel.

Bidding documents shall include the Contractor's proposed Asphalt Mixture Design sheets. (Ref. Mix Design Submittal Checklist sheet at the end of this document.)

Testing

Testing required to validate or control the mix supplied is the Paving Contractor's responsibility and will be included in the bid cost of the HMA. Daily maximum theoretical specific gravity (G_{mm}) must be made available to the Contractor's density technician for verifying in-place density within four hours of start of production. Asphalt content, gradation, and bulk specific gravity shall be performed each day of production. Acceptable average measures shall be made by use of a correlated nuclear density gage, a correlated Pavement Quality Indicator or Pave-Tracker (nonnuclear).

The average in-place density measure for the surface course mixture shall be 94% of the (G_{mm}) with no value less than 92.5% of the (G_{mm}).

Equipment

The Tack/Prime Coat Distributor Truck, the Haul Truck, the Paving Equipment, and Rollers must all meet the requirements set forth in these documents.

Preparation for Paving

1. Remove all fencing and fence posts; remove the existing net posts and net anchor posts. Properly install the sleeves for the proposed fence and net posts as well as the net anchor base.
2. Fill all existing court cracks wider than 1/2-inch with a fine stone aggregate to the top of the existing court surface. Remove all previous crack repair tape that is not completely bonded to the court surface.
3. Construct a 4-inch thick compacted CA-6 crushed stone debonding base layer on the existing surface and extending to a minimum of 18" beyond the proposed fence line. This work shall be accomplished by placing the aggregate with an asphalt paver. String lines must be used to assure the proper depth and grade of the finish surface of the stone base. The elevation, slope, and smoothness of the stone base must be verified.
4. Place a prime coat of MC-30 oil at a rate of 0.10 gal/sq yd or as directed by the Engineer.
5. Inspect the aggregate surface and repair or recompact any areas that may have been damaged due to the tires of the oil distributor.
1. Install string lines for the guidance of the asphalt paver.

2. Place and compact the 1-½" binder course; inspect and verify the elevations; smooth any variations more than an elevation of 1/8" from plan; then place the tack coat in preparation of the final asphalt surface course.
3. Again, place string line for the guidance of the paver and then place and compact the 1-1/2" surface course.
4. Sawed control joints shall be dry cut with a 1/8" wide blade through the top layer of asphalt and to a depth of 1" into the binder course. The cut should be made as soon as the cutting machine wheels do not leave any marks in the new pavement. The joint should be centered between net posts, and centered between side lines of adjacent courts.

Pavement Placement

1. Install the HMA which will generally arrive on the project between 270 – 300° Fahrenheit asphalt in weather conditions that are dry, no rain, snow, or other forms of precipitation falling or imminent and with a temperature of 50° and rising.
2. Establish an acceptable rolling pattern with the assistance of the density technician.
3. Surface Course longitudinal joints must be smooth and true. Detail and submit to the Owner a paving plan on the site prior to the placement of the asphalt.
4. The entire surface course shall be paved on the same day for each lift.
5. Rolling shall start as soon as the HMA can be compacted without displacement. Rolling shall continue until the HMA is thoroughly compacted and all roller marks have disappeared. Compact the HMA to a minimum in-place density of 94% of the (G_{mm}).
6. Smoothness shall meet the requirement of no greater than 1/8" in 10 ft. for the surface course.
7. Thickness of the overall surface mat shall be within ¼" and no minus of the specified plan thickness at all locations.
8. Minimize the number of paving joints. Construct the longitudinal joints by paving in a hot fashion with a temperature of not less than 220° to ensure maximum performance.
9. Compact all joints to provide for a neat, uniform tightly bonded joint that will meet both surface tolerances and density requirements.
10. Ensure positive drainage off the courts surface. Any ponding of water is not acceptable and shall require correction or replacement at the Contractor's expense and as directed by the Engineer. Flood the pavement area as directed by the Owner and in the presence of the Engineer and paving Contractor to determine positive drainage acceptability.
11. Protect the new HMA surface until such time that coating can be placed upon the properly compacted asphalt, particularly during other construction activities between asphalt installation and athletic surface installation.

12. Excessive leveling and smoothness corrections required to be performed by the paving contractor shall be the responsibility of the paving contractor.

FENCING REQUIREMENTS

Fence post footing and sleeves shall be installed prior to the paving operations. The tops of the fence posts footings must terminate below the asphalt pavement to minimize reflective or radial cracking of the new asphalt surface.

The chain-link fabric shall be vinyl coated, 9-gauge, 1-3/4" sized mesh. Fence fabric shall have selvages, both top and bottom, bent double.

Fence frames will be galvanized steel posts, rails, and accessories.

The fence located at each end of the courts as well as a 30 foot return on the sides of the courts and the dividing fence shall be 8 feet high. The fence along the mid portion of the courts shall be 42" high. 8 foot fencing line posts will be 3" diameter while 42" high fencing line posts will be 2-1/2" diameter. Top and Bottom rails will be required for both the 8 foot fence and 42" high fence. Post spacing shall be 10 foot maximum for all fencing. Chain-link fence fabric is attached to line posts with wires every 12". The fabric is attached to the terminal posts with tension bands and tension bars 12" on center minimum. The fence fabric is tied to the top and bottom rails at intervals of approximately 18". The fence fabric must be placed on the court side of the fence posts. See the accompanying drawing for fence post concrete footings and further fencing details.

NET POSTS AND CENTER ANCHORS

The net post footings, sleeves, and center strap anchor shall terminate below the proposed asphalt surface.

The net posts shall be 3" diameter steel posts equipped with a winding mechanism to tighten the net. The net posts and winding mechanisms must come from an approved manufacturer and be approved by the Owner prior to installation.

Net posts shall be set in sleeves for easy removal or replacement. The depth to the bottom of the footing shall be a minimum of 72" below the playing surface. The sleeves may be made of minimum Schedule 40 PVC or an approved equal.

Posts to be set at 42'-0" center to center.

Details of the net posts as shown on the accompanying drawing.

The anchor shall be constructed as shown on the accompanying drawing.

ACRYLIC COURT SURFACE SYSTEM

The entire court footprint will be covered with an Owner approved color coating system that provides 2 coats of acrylic coat filler and 2 coats of an acrylic surface. The court lines shall be painted with 2 coats of acrylic line paint recommended by the color coating manufacturer.

Once cured, the asphalt pavement is prepared for application of a color surface. To properly apply a color coating system, the new pavement must be thoroughly cleaned to ensure all foreign materials are removed. At this time, the pavement is flooded with water and allowed to drain to check for planarity. Low areas are defined as any areas where standing water more than 1/16" deep remains after the drainage of the area has been ceased and after one hour at 70 degrees F or

above in sunlight. High areas should be leveled by scraping or grinding. Low areas in the surface should be patched and leveled according to the recommendations of the manufacturer of the color surface prior to proceeding with coating.

Once the pavement has been properly prepared, the next step is the application of filler or texture coats. No coating work, including filler coats, may be performed when rain is imminent or when the surface or air temperatures are below 55 degrees F for 24 hours before and after the application of each coat. One or more filler coats, compatible with and approved by the colored surface supplier should be applied to remove minor surface irregularities and to fill the voids in the asphalt surface. Typically, the filler coat or coats consist of an acrylic binder mixed with sand aggregate and are applied with a squeegee. Following their application, filler materials should be thoroughly dried and cured. If shrinkage cracks appear, they must be addressed prior to application of subsequent coats of surfacing material.

Color finish coats are applied next. A minimum of two coats of color coating are applied with a squeegee. All color coats should contain sand. These coatings should be applied smoothly and to a uniform thickness over the entire court surface.

Each coat should dry thoroughly before a succeeding coat is applied in accordance with the recommendations of the manufacturer. Once coated and thoroughly dried, the court is lined. All dimensional measurements are to the outside of the line. The lines shall be white and shall be continuous.

The lines are taped with the use of a taping machine. Lines are painted with two coats of textured latex or acrylic line paint recommended by the manufacturer of the color coating system. A primer should be used over the masking tape prior to painting to prevent paint from bleeding under the tape. Lines shall be hand-brushed or rolled, not sprayed.

Closeout

Remove all waste materials from the site and dispose of properly.

Notify the Owner when all work is complete.

Supply the Owner with Notarized Certificate of Compliance for all products used on the project.

Supply the Owner with density determinations and yield calculations for the HMA Surface Course.
