GMP Presentation to GISD Board

Attached, please find a projected bond budget update along with the GMP documents from BTC. Let me give a brief explanation of what you will see.

We had several alternates in our Admin building package. They are:

Alternate 1 is to include an inside security vestibule. **Alternate 2** was an outside vestibule. By code, we have to have one or the other and we chose the lesser cost of alternate 1.

Alternate 3 is to include the technology and curriculum areas in the renovation project. Due to cost concerns, it was not included in the base bid. I could not, in good conscious, recommend this project if we don't include this alternate.

Alternate 4 is to renovate the existing kitchen area to make it a place for staff to prepare and eat lunch. This is the least important of the alternates, but I do think it would be a nice addition to the project, especially since we will be doing a large amount of training in this building with outside staff and community members.

Alternate 5 is to renovate the large student restrooms and make them more of an office/type restroom. Right now there are no doors, the sound is loud and the smell is bad, and these restrooms will be located right outside several office areas. On behalf of the staff, I highly recommend we consider this alternate.

Other info:

You will see a line item under the **GHS project** for **"soft costs"** and there is a question mark in the dollar column. We believe we will get some of this money back, but to be ultra-conservative, we did not attach a dollar figure to this line.

We also believe there will be other dollars coming back to us as we will likely not spend every dollar in the budget in every area, and our earnings on interest are expected to be higher than we have included. But, we are trying to be very conservative with what we present to you.

After you review this, if you have questions for me, please call or email and we will do our best to answer your question ASAP.
